Source: VanEck

Past performance does not predict future returns.

Performance quoted represents past performance. Current performance may be lower or higher than average annual returns shown.

The Dutch domiciled ETFs use a gross reinvestment index as opposed to many other ETFs and investment funds that use a net reinvestment index. Comparing with a gross reinvestment index is the purest form since it considers that Dutch investors can deduct or reclaim the dividend tax levied. Please note that the performance includes income distributions gross of Dutch withholding tax because Dutch investors can deduct or reclaim the 15% Dutch withholding tax levied. Different investor types and investors from other jurisdictions may not be able to achieve the same level of performance due to their tax status and local tax rules.

Returns may increase or decrease as a result of currency fluctuations.

*Periods greater than one year are annualised.

Yields

31 August 2024

| | |
|-----------------------------|-------|
| 12-Month Yield ¹ | 1.26% |
|-----------------------------|-------|

¹The 12-Month Yield is the yield an investor would have received if they had held the fund over the last 12 months assuming the most recent NAV. The 12-month yield is calculated by summing any income distributions over the past 12 months and dividing by the sum of the most recent NAV and any capital gain distributions made over the past 12 months. The dividend paid may differ from the dividend yield of the index by increasing or decreasing the fund. A part of the dividend can be reinvested whereby this is processed in the price and not paid out.

Key Risks

While the diversification in a multi-asset strategy reduces risk, it is important to remember that all investments carry some risk. The Multi-Asset Funds by VanEck are subject to the four risks below:

Property Risk: Investments in real estate securities can be affected by the general performance of stock markets and the property sector. Interest rate changes, in particular, can have a negative impact.

Interest Rate Risk: Increases in interest rates have a significant impact on the value of fixed-income securities issued by governments and companies. Potential or actual downgrades in credit ratings can also impact prices. This is another risk factor of a Multi-Asset ETF.

Market Risk: The value of stocks depends on daily market fluctuations. Other factors that influence them include political and economic news, company results and material corporate events.

Credit Risk: If the issuer of a bond is unable to pay interest or repay capital, the value of that bond will fall.

For more information on risks, please see the "Risk Factors" section of the relevant Fund's prospectus, available on www.vaneck.com.

IMPORTANT INFORMATION

This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID before making any final investment decisions.

This information originates from VanEck (Europe) GmbH, which has been appointed as distributor of VanEck products in Europe by the Management Company VanEck Asset Management B.V., a UCITS Management Company incorporated under Dutch law and registered with the Dutch Authority for the Financial Markets (AFM). VanEck (Europe) GmbH, with registered address at Kreuznacher Str. 30, 60486 Frankfurt, Germany, is a financial services provider regulated by the Federal Financial Supervisory Authority in Germany (BaFin). The information is intended only to provide general and preliminary information to investors and shall not be construed as investment, legal or tax advice. VanEck (Europe) GmbH and its associated and affiliated companies (together "VanEck") assume no liability with regards to any investment, divestment or retention decision taken by the investor on the basis of this information. Information herein may change at any time; current data may differ from data quoted. Information provided by third party sources is believed to be reliable and have not been independently verified for accuracy or completeness and cannot be guaranteed. Brokerage or transaction fees may apply.

VanEck Asset Management B.V., the management company of VanEck Multi-Asset Conservative Allocation UCITS ETF (the "ETF"), a sub-fund of VanEck ETFs N.V., is a UCITS management company incorporated under Dutch law and registered with the Dutch Authority for the Financial Markets (AFM). The ETF is registered with the AFM, passively managed and tracks a combination of bond and equity indexes. Investing in the ETF should be interpreted as acquiring shares of the ETF and not the underlying assets.

Investors must read the sales prospectus and key investor information before investing in a fund. These are available in English and the KIDs in certain other languages as applicable and can be obtained free of charge at www.vaneck.com or from the Management Company.
