The VanEck Bitcoin ETN is a fully-collateralized exchange traded note that invests in bitcoin. The note seeks to replicate the value and yield performance of the MarketVector Bitcoin VWAP Close Index (MVBTCV Index).

- Direct access to the biggest and most liquid cryptocurrency, bitcoin
- 100% backed by bitcoin and stored in cold storage at a regulated crypto custodian with crypto insurance (up to a limited amount)
- Tradeable like an ETF on Deutsche Börse Xetra

Past performance does not predict future returns.

Periods greater than one year are annualised.

The table presents past performance which is no guarantee of future results and which may be lower or higher than current performance.

Investment returns will fluctuate so that investors' notes, when redeemed, may be worth more or less than their original cost. ETN returns assume that any capital gains have been reinvested. An index's performance is not illustrative of the ETNs's performance. Indices are not securities in which investments can be made.

The ETN value is determined at 4:00 PM CET of each business day, and represents the dollar value of one note; it is calculated by taking the total assets linked to the ETN, subtracting total liabilities, and dividing by the total number of notes outstanding. The value is not necessarily the same as the ETNs' intraday trading price. Investors should not expect to buy or sell the ETN at the determined value. Please see the reverse side for important disclaimers.

Any investment decision should be made on the basis of an understanding of the prospectus and the key information document ("KID"), which is available at www.vaneck.com and VanEck (Europe) GmbH at its registered office at Kreuznacher Straße 30, 60486 Frankfurt am Main, Germany. Please read these documents before investing and take note of the risk factors. Note: no guarantee can be provided that the ETN will attain its objective. The value of an investment may decline as well as increase. All persons interested in investing in the ETN are recommended to seek advice from independent legal and tax advisors in order to ascertain whether the investment is appropriate to their own objectives.

You can lose money by investing in the ETN. Any investment in the ETN should be part of an overall investment program. An investment in the ETN may be subject to risks which include, among others, material transaction cost from rebalancing activity and fluctuations in the value of digital assets held by the issuer of the ETN due to market and economic conditions or factors relating to specific issuers. Certain digital assets may be more volatile than others. Please see the prospectus and key information document for information on these as well as other risk considerations.
