1. General information

Board of Directors and Manager

VanEck Asset Management B.V. is the company's director according to the articles of association ('the Board of Directors') and acts as manager of the Company as referred to in section 2:65 of the Dutch Financial Supervision Act (Wft) ('the Manager'). The Board of Directors of VanEck ETFs N.V. are also responsible for the audit committee tasks. The Manager has its registered office in Amsterdam and holds offices at Barbara Strozilaan 310, 1083 HN Amsterdam.

The composition of the Board of Directors is as follows:

- Mr M. Rozemuller;
- Mr G. Koning.

Supervisory Board

The supervisory board of the Manager exercises supervision on the Manager's management and on the general course of affairs at the Manager. The supervisory board is made up of:

- Mr B.J. Smith;
- Mr A.E. Philips;
- Mr T. Hunke;
- Mr J.R. Simon.

2. Profile

VanEck ETFs N.V. (hereafter: 'VanEck' or the 'Company') was incorporated on 2 October 2009. The Company is an open-ended investment company with variable capital under Dutch law in the sense of article 2:76a of the Dutch Civil Code. This means that the Company will in principle issue, reissue, or purchase shares on request on any trading day. The Manager was granted a licence as referred to in section 2:65 Wet of het financieel toezicht (Wft) on 12 October 2009.

Structure

The Company has what is referred to as an umbrella structure. This entails that the ordinary shares are divided into several series of shares, each designated with a letter. Every series of shares is designated as a fund to which a portion of the Company's assets is allocated (hereafter: 'Sub-fund'). Separate records are kept for every Sub-fund so that all the income and costs attributable to a Sub-fund are reported per Sub-fund. If the Prospectus makes reference to the assets of a Sub-fund, this is defined as the Company's assets allocated to the relevant Sub-fund.

The amount to be paid up on every share in a Sub-fund and the assets attributable thereto is invested for the benefit of the relevant Sub-fund. Every Sub-fund has an individual investment policy, which means every Sub-fund has its own risk profile and pricing. Increases and decreases in the value of the portfolio of a particular Sub-fund are exclusively for the benefit of or at the expense of the holders of the shares in that Sub-fund. The specific characteristics are described in more detail in a Supplement to every Sub-fund.

Since its incorporation, the Company has had the following fourteen Sub-funds listed:

In 2009

- Sub-fund A: VanEck AEX UCITS ETF, NL0009272749
- Sub-fund B: VanEck AMX UCITS ETF, NL0009272756
- Sub-fund C: VanEck Multi-Asset Conservative Allocation UCITS ETF, NL0009272764
- Sub-fund D: VanEck Multi-Asset Balanced Allocation UCITS ETF, NL0009272772
- Sub-fund E: VanEck Multi-Asset Growth Allocation UCITS ETF, NL0009272780

As of 14 April 2011

- Sub-fund F: VanEck Global Equal Weight UCITS ETF, NL0009690221 (Merged with Sub-fund K on 8th of October 2021)
- Sub-fund G: VanEck Global Real Estate UCITS ETF, NL0009690239
- Sub-fund H: VanEck iBoxx EUR Corporates UCITS ETF, NL0009690247
- Sub-fund I: VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF, NL0009690254

As of 26 November 2012

- Sub-fund J: VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF, NL0010273801

As of 13 May 2013

- Sub-fund K: VanEck Sustainable World Equal Weight UCITS ETF, NL0010408704

As of 1 October 2014

- Sub-fund L: VanEck European Equal Weight UCITS ETF, NL0010731816

As of 11 November 2015

- Sub-fund M: VanEck Morningstar North America Equal Weight UCITS ETF, NL0011376074

As of 23 May 2016

- Sub-fund N: VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF, NL0011683594

Issue and purchase of ordinary shares

The Company is an open-ended investment company. This means that the Board of Directors will, on request, issue shares and/or sell purchased shares at the transaction price of a share as determined at the moment of issue or sale. The transaction price corresponds to the Net Intrinsic Value of the relevant share in a specific Sub-fund. The Board of Directors reserves the right to temporarily suspend the issue or purchase of shares. Suspension can take place, for instance, in cases in which the determination of the Net Intrinsic Value can also be suspended, as further explained in section VII (determination of Net Intrinsic Value) of the Prospectus. Shares in the Company can be bought and sold on Euronext Amsterdam or other exchanges where the Sub-funds are listed, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded.

UCITS

The Company is an Undertaking for Collective Investment in Transferable Securities (UCITS). The Manager has had a licence as referred to in section 2:65 Wft since 4 March 2011. To obtain a licence, restrictions aimed at investor protection are imposed for the investment policy of a UCITS. The most important restrictions entail, summarised here, that the aim of a UCITS is exclusively to invest in financial instruments or other liquid financial assets with application of the principle of risk diversification. On grounds of the so-called UCITS directive, the shares of a UCITS can be relatively easily offered for sale in another member state of the European Union or a state which is not a member of the European Union but which is party to the Agreement on the European Economic Area.

Investment policy

Unlike traditional investment institutions which have an active investment policy and whereby the investment institution actively seeks out investments within its investment policy, the Company in principle has a passive investment policy whereby the assets to be allocated to a Sub-fund are invested for the benefit of the Sub-fund with the aim of following the Index or Indices which serve as the benchmark for the Sub-fund as closely as possible. This keeps management costs low and ensures that the composition of the assets of every Sub-fund is transparent.

The assets of a Sub-fund can be invested in underlying securities from various indices or combinations of indices in different asset classes, always taking into account the index or indices specified in the relevant supplement of the Prospectus and the ratios in which the Sub-fund invests in these indices. The Company will buy financial investment instruments via regulated markets anywhere in the world. The Company is not authorised to contract loans as a debtor and/or lend out Underlying Securities.

Fiscal status

The Company is a public company with registered office in Amsterdam, incorporated under Dutch law. The Company opts for the status of fiscal investment institution (FII) as referred to in section 28 of the Corporation Tax Act 1969. An FII is subject to a 0% rate for the levy of corporation tax if certain conditions are satisfied.

Dividend tax

The Company will in principle have to withhold 15% dividend tax on dividends it pays out. This dividend tax is not at the Company's expense, but at the expense of the Company's shareholders. When paying the withheld dividend tax to the tax and customs administration, the Sub-fund may deduct an amount in connection with the Dutch and foreign source taxation withheld on dividends and interest income received by it ('deduction').

3. Report from the Board of Directors

Report 2021

2021 marked the twelfth year of VanEck ETFs N.V. (the ETFs or Sub-funds) existence since the listing of the first ETFs on 14 December 2009.

The total fund assets under management increased in 2021 from EUR 1,060 million on 31 December 2020 to EUR 1,660 million on 31 December 2021, an increase of roughly 55%. The assets under management totalled EUR 1,706 million at the beginning of April 2022.

On October 8th, 2021, Series F – VanEck Global Equal Weight UCITS ETF was merged with Serie K – VanEck Sustainable World Equal Weight UCITS ETF.

Furthermore, the ETFs have been registered for distribution in several countries and listed at certain stock exchanges. Apart from our full ETF range that is listed at Euronext Amsterdam (primary listing) and Euronext Brussels, eight (8) out of thirteen (13) ETFs are also listed at the Deutsche Börse, London Stock Exchange, Borsa Italiana and the Swiss Stock Exchange.

Potential Implication of Brexit

On 31 January 2020, the UK formally withdrew from and ceased being a member of the EU. The UK and the EU entered into a transition period until 31 December 2020 (the “Transition Period”) during which time the UK was subject to applicable EU laws and regulations which has now concluded. The future relationship between the UK and the EU may cause uncertainty in the global financial markets, and adversely affect the performance of the sub-funds. Volatility resulting from this uncertainty may mean that the returns of the sub-funds’ investments are adversely affected, for example, by market movements and potential decline in the value of Sterling and/or Euro or reduced liquidity in certain securities. This may also make it more difficult, or more expensive, for the sub-funds to execute prudent currency hedging policies were implemented by the relevant Investment Manager. The UK’s exit from the EU may change the legal and regulatory landscape, increasing operating and compliance costs for the Company.

Coronavirus disease (COVID-19)

The Board of Directors is aware that global financial markets have been monitoring and reacting to the impact of COVID 19 on the Company. All markets have incurred increased volatility and uncertainty since the onset of the pandemic. As the sub-funds track indices, they are exposed to the movements of the underlying indices which were volatile post year end following COVID-19.

The Board of Directors has also noted the operational risks that are posed to the Company and its service providers due to global and local movement restrictions that have been enacted by various governments. COVID-19 pandemic is an unprecedented event and the eventual impact on the global economy and markets will largely depend on the scale and duration of the outbreak. The Board of Directors will continue to monitor this situation.

Financial information

The Sub-funds have the objective of following their benchmark, in other words the selected index, as closely as possible. The degree to which they succeed at this is shown by the Tracking Difference and Tracking Error, which is why the emphasis is on these. The financial development of the Sub-funds represents the price developments in the indices followed; the manager has no influence on these price developments. For the financial details of the various Sub-funds, see the financial statements of the different Sub-funds.

The Tracking Difference (T.D.) is the difference in yield between the product and a particular benchmark. The benchmark is often an index. It could be a well-known stock market index, or a customised index. It is important in this context whether the benchmark is a price index or a gross total return index.

In addition to the Tracking Difference, the Tracking Error is relevant as well. The following definition applies for the Tracking Error (T.E.). Tracking Error = Annual volatility of the monthly tracking differences, $T.E. = \sqrt{\frac{\sum_{i=1}^n (p_i - b_i)^2}{n-1}}$ whereby p is the fund yield and b the index yield.

The key reasons behind the differences between the product yield and benchmark yield are, successively, the management fee, the cash drag, the dividend tax drag and pricing differences (for bond ETFs).

The term cash drag stands for the fact that the dividends and coupon payments received are held in the fund as cash and are not reinvested, therefore. The term dividend tax drag means that the claim for a refund of the withheld dividend tax only becomes visible after the fund pays dividend.

The Tracking Differences and Tracking Errors of the VanEck Vectors UCITS ETFs are set out below.

Series	Benchmark	Tracking Difference	Tracking Error
Serie A – VanEck AEX UCITS ETF	AEX Total Return Index (gross)	(0.39%)	0.25%
Serie B – VanEck AMX UCITS ETF	AMX Total Return Index (gross)	(0.53%)	0.26%
Serie C – VanEck Multi-Asset Conservative Allocation UCITS ETF	Multi-Asset Conservative Allocation Index	(0.13%)	0.31%
Serie D – VanEck Multi-Asset Balanced Allocation UCITS ETF	Multi-Asset Balanced Allocation Index	(0.68%)	0.25%
Serie E – VanEck Multi-Asset Growth Allocation UCITS ETF	Multi-Asset Growth Allocation Index	(0.70%)	0.28%
Serie F – VanEck Global Equal Weight UCITS ETF	Solactive Global Equity Index	(0.45%)	0.19%
Serie G – VanEck Global Real Estate UCITS ETF	GPR Index Total Return (gross)	(0.82%)	0.23%
Serie H – VanEck iBoxx EUR Corporates UCITS ETF	iBoxx Corp Index Total Return (gross)	(0.15%)	0.11%
Serie I – VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF	iBoxx Sov. Index Total Return (gross)	(0.13%)	0.04%
Serie J – VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF	Markit iBoxx EUR Liquid Sovereign Sovereign Capped AAA-AA 1-5 Index (gross)	(0.12%)	0.04%
Serie K – VanEck Sustainable World Equal Weight UCITS ETF	Solactive Sustainable World Equity Index	(0.63%)	0.18%
Serie L – VanEck European Equal Weight UCITS ETF	Solactive European Equity Index	(0.49%)	0.24%
Serie M – VanEck Morningstar North America Equal Weight UCITS ETF	Morningstar North America 100 Equal Weight Index (gross)	(0.23%)	0.16%
Serie N – VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF	Morningstar Developed Markets Large Cap Dividend Leaders Index (gross)	(0.30%)	0.30%

Tracking Difference= yield VanEck Vectors UCITS ETF (including dividend) – yield gross total return benchmark (including dividend).

Tracking error= The standard deviation from the difference between the price development of the VanEck Vectors UCITS ETF and the relevant benchmark.

Distributions during the period

Dividend was paid out on all ETFs in March, June, September, and December. The Board of Directors intends to pay out dividend quarterly if dividend was received in the particular fund. This is related to the obligation to distribute profits. On grounds of the tax status as Fiscal Investment Institution, VanEck is required to pass on the direct profits to the shareholders.

Remuneration policy

The remuneration policy is in line with the manager's strategy and the objective and investment policy of VanEck. In 2020 the members of the Board of Directors and the other staff of the asset manager received a retention bonus and a variable remuneration next to the fixed remuneration. The retention bonus includes a share component and a deferred component. Variable remuneration is also deferred. The retention bonus and the variable remuneration are paid out as follows:

- 40% directly
- 20% after 1 year
- 20% after 2 years
- Remaining 20% after 3 years

The remuneration for the 2021 financial year is as follows:

(amounts x € 1)	Number	Fixed	Variable	2021
Board of Directors	2	861,857	1,138,495	2,000,352
Non-identified staff (FTE)	14	1,497,223	882,500	2,379,723
Total	16	2,359,080	2,020,995	4,380,075

The amounts above are gross amounts. Retention bonus is included under the variable amounts.

Risk management

VanEck monitors its ETFs continuously to make sure they comply with all relevant rules and regulation. VanEck's objective is to have its ETFs follow the relevant index as closely as possible, both as the index goes up and as it goes down. The risk that markets can go down is not hedged. This brings the investment risks of the ETFs entirely in line with the investment risks of the particular reference indices. The ETFs are subject to operational risks, something VanEck recognizes and therefore the board is hands-on involved in risk management. The way in which VanEck mitigates the relevant operational risks as much as possible, is discussed in more detail below.

To understand the relevant risks, it's good to note that VanEck owns all the underlying securities for the benefit of the ETFs. No use is made of synthetic replication. The underlying securities are held in custody by State Street Bank International GmbH Amsterdam Branch. VanEck consciously opts not to lend out these underlying securities; this prevents counterparty risk from arising. Under the Securities (Bank Giro Transactions) Act (Wge), the assets of the funds are legally separate from State Street Bank. Any bankruptcy on the part of State StreetBank would not affect the assets of the VanEck.

As from 01-02-2021 State Street is the new depositary and custodian instead of CACEIS Bank.

Most processes and procedures are outsourced. VanEck closely monitors these processes and procedures via an ISAE3402 report. We can identify the following operational risks:

Creation/redemption

This concerns the issuing of new shares and/or the taking back of shares issued earlier. The underlying instruments are delivered on the basis of DVP, delivery versus payment, with the counterparty being an Authorised Participant (AP) or a broker. In the creation process, the ETFs are delivered and the basket of shares, or bonds, reflecting the percentages in the index or indices is received. The opposite takes place for a redemption. To make sure the creation/redemption is executed correctly there is a four eye check at the operational level, additional check takes place in a compliance monitoring system before the transactions can be executed. Both VanEck and the AP check that the composition is correct - it is in the interest of both parties that the composition be correct, after all.

Reweighting

Whenever an index is reweighted, VanEck takes the necessary action to reweight the ETFs as well. Either by reweighting the fund itself by means of an execution-only agreement with State StreetBank or another broker. To make sure the reweighting is executed correctly there is a four eye check at the operational level, additional check takes place in a compliance monitoring system before the transactions can be executed.

Distribution by VanEck ETFs

Distribution takes place on cash basis and is only made from the freely distributable reserves. It is also monitored whether adequate cash and cash equivalents remain to cover the costs that will be charged to the fund in the next period. This prevents a situation from arising in which the fund must sell assets to pay the costs.

Corporate actions

In the event of corporate actions in underlying securities, VanEck follows the index followed by the particular ETF.

Settlement risk

All settlement risks have been offset with the use of DVP. One of the risks that cannot be offset is the market (delta) risk of non-settlement of the underlying securities in the event a counterparty defaults.

Compliance risk

VanEck runs the risk of losses as the result of deficient or faulty internal processes, internal control, human error, system error or errors caused by external events. Operational risk encompasses business risk, legal, tax and compliance risk, the system of fraud, supervisory risk, administrative risk, system risk, personnel risk and risk of use of IT systems including improper access to data by third parties.

Statement concerning business operations

We have a description of the business operations that satisfies the requirements of the Financial Supervision Act (Wft) and the Decree on Conduct of Business Supervision of Financial Undertakings under the Wft (BGfo).

We assessed various aspects of the business operations during the past financial year. In our activities we did not discover anything on grounds of which we must conclude that the description of the set-up of the business operations as referred to in section 121 of the BGfo does not satisfy the requirements contained in the Financial Supervision Act and related regulations.

On these grounds, we declare as manager for VanEck that we have a description as referred to in section 121 BGfo which satisfies the requirements of the BGfo.

We ascertained nothing that indicated that it was not functioning effectively and in accordance with the description. We therefore declare with a reasonable degree of assurance that the business operations functioned effectively and in accordance with the description throughout the year under review

Risks of financial instruments

Based on the Sub-funds' activities, the Sub-funds are exposed to several financial risks: market risk (consisting of market risk, currency risk and interest rate risk), credit risk and liquidity risk. Quantitative risk disclosures are included in the financial statements of the Sub-funds.

Price risk

VanEck's objective is to have its ETFs follow an index as closely as possible, both as it goes up and as it goes down. Consequently, every Sub-fund's risk profile is identical to the risk profile of the selected index. No hedging of risks takes place in principle, therefore. As a result, the ETFs are exposed to significant price risk if markets go down.

Currency risk

The Sub-funds VanEck AEX UCITS ETF, VanEck AMX UCITS ETF, VanEck iBoxx EUR Corporates UCITS ETF, VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF and VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF are only invested in euro and the Sub-funds VanEck Multi-Asset Conservative Allocation UCITS ETF, VanEck Multi-Asset Balanced Allocation UCITS ETF, VanEck Multi-Asset Growth Allocation UCITS ETF, VanEck Global Equal Weight UCITS ETF, VanEck Global Real Estate UCITS ETF, VanEck Sustainable World Equal Weight UCITS ETF, VanEck European Equal Weight UCITS ETF, VanEck Morningstar North America Equal Weight UCITS ETF and VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF, are invested in multiple currencies, which are indeed exposed to currency risk; the currency risk is not hedged.

Interest rate risk

VanEck's objective is to have its ETFs follow an index as closely as possible, both as it goes up and as it goes down. Consequently, every Sub-fund's risk profile is identical to the risk profile of the selected index. No hedging of risks takes place in principle, therefore. The Sub-funds with monetary financial instruments with a fixed interest rate in the portfolio are consequently exposed to significant interest rate risk if interest rates go up.

Credit risk

VanEck's objective is to have its ETFs follow an index as closely as possible, both as it goes up and as it goes down. Consequently, every Sub-fund's risk profile is identical to the risk profile of the selected index. No hedging of risks takes place in principle, therefore. The Sub-funds with monetary financial instruments in the portfolio are consequently exposed to significant credit risk if the solvency of the underlying companies the ETF has invested in deteriorates.

Bankruptcy risk

VanEck's objective is to have its ETFs follow an index as closely as possible, both as it goes up and as it goes down. Consequently, every Sub-fund's risk profile is identical to the risk profile of the selected index. No hedging of risks takes place in principle, therefore. The Sub-funds with monetary financial instruments in the portfolio are consequently exposed to significant bankruptcy risk if one of the companies the ETF has invested in goes bankrupt.

Liquidity risk

VanEck is an open-ended investment company. This means that the Board of Directors will, on request, issue shares and/or sell purchased shares at the transaction price of a share as determined at the moment of issue or sale. The transaction price corresponds to the Net Asset Value of the relevant share in a specific Sub-fund. Shares in VanEck can be bought and sold via an intermediary on Euronext Amsterdam and/or other regulated stock exchanges where the Sub-funds are listed whereby the Liquidity Providers ensure that there is both a bid and ask price at which the share can be traded.

VanEck provides daily liquidity. Under normal circumstances, all positions can be sold within a day without realising significant losses. However, unforeseen circumstances can give rise to abnormal conditions which could cause VanEck to face liquidity risk. It could be unable to sell its positions as a result. The degree to which the securities in which the relevant Sub-fund invests can be traded affects the height of the actual buy and sell prices. This could mean that securities cannot be sold or can only be sold at a substantially lower price than the valuation assigned and the relevant Sub-fund may be unable to free up adequate funds to satisfy its purchase obligations. The bid/ask prices can deviate from the asset value of the share in the relevant Sub-fund, as a result of which the performance may deviate from that of the underlying Index or Indices, certainly in the event of limited liquidity on the market. To limit this risk, only listed securities are normally invested in. In exceptional circumstances, if the purchase of shares in VanEck is suspended for instance, there could be a risk that the investor may be unable to sell his investment at the desired moment or for a reasonable price. Given the open-ended character of VanEck, it could be confronted with a high number of exits which would mean investments would have to be liquidated under potentially unfavourable conditions, which would negatively impact the value of the share.

SFDR and Taxonomy Regulation Disclosures

The European Union's ("EU") Sustainable Finance Disclosures Regulation (Regulation EU/2019/2088) ("SFDR") requires the Company to provide transparency on how sustainability considerations are integrated into the investment process with respect to each of the sub-funds. The EU's Regulation on the Establishment of a Framework to Facilitate Sustainable Investment (Regulation EU/2020/852) (the "Taxonomy Regulation") requires the Company to provide additional disclosure with respect to each of the sub-funds in order to enhance transparency and to provide for objective comparison of financial products regarding the proportion of such financial products' investments that contribute to environmentally sustainable economic activities, noting that the scope of environmentally sustainable economic activities, as prescribed in the Taxonomy Regulation, is narrower than the scope of sustainable investments under SFDR. Please see the Relevant

Supplement for the disclosures for each sub-fund required under SFDR and the Taxonomy Regulation.

Sub-Funds that are SFDR Article 6 financial products

With respect to funds mentioned below, the investments underlying each of these sub-funds do not take into account the EU criteria for environmentally sustainable economic activities. SFDR does not require the Company to provide any further disclosures on these matters in the Annual Report for these sub-funds.

Fund Governance

VanEck endorses the importance of Fund Governance and uses independent external parties for the administration, calculation of the intrinsic value, and the custody of securities; it uses multiple Liquidity Providers in support of the stock market listing of its ETFs.

The members of the Board of Directors hold positions in VanEck's ETFs. See chapter 6 for a detailed overview of these interests as of year-end 2021. The transactions by the members of the Board of Directors in VanEck's ETFs are reported to the Compliance Officer in accordance with the rules for Private Investing Transactions.

Voting policy

The Company has entered into a service agreement with Glass Lewis Europe Limited and can use their voting advice for exercising the voting rights on shares held by the relevant Sub-funds. For some Sub-funds voting rights are exercised based on this service agreement if this is cost efficient. This is determined based on, among other things, the AUM.

For the Sub-funds that do not use the voting advice of Glass Lewis Europe Limited, the Company will not exercise voting rights on shares in other undertakings unless there are exceptional circumstances in which the Company's shareholders would be significantly disadvantaged. In that case, the Company's voting will be guided primarily by the interests of the Company's shareholders.

Efficient Portfolio Management

Efficient Portfolio Management is defined as the use of techniques and instruments in relation to securities and money market management, including securities borrowing and lending, the contracting of repurchase agreements (repos) and reverse repurchase agreements. The Sub-funds did not make any use of Efficient Portfolio Management during the year under review.

Outlook

With the COVID-19 epidemic looking to be on its return, we expect 2022 to be the year in which our operations in the office will return to normal. Because the work from home situation of the last two years has worked well, this will not have a big impact. But if anything, it will improve the social cohesion of our team.

VanEck Asset Management B.V. is aware of new sanctions against Russia that were announced on February 24, 2022 and February 28, 2022, and as described in the directives of Executive Order 14024 (EO 14024), and intends to comply with such, including any future modifications or changes to the order. VanEck Compliance department is currently reviewing the sanctions and will determine the impact and the steps that need to be taken to comply with requirements. With respect to blocked Russian financial institutions, VanEck will take appropriate actions to divest from these entities, if needed, and as permitted by general licenses. VanEck is closely monitoring the ongoing situation with Russia and Ukraine.

Even before COVID-19 and the current geo-political turmoil it has always been difficult to provide a good outlook on the growth of our business because of the unpredictable nature of the markets and the way that can impact our business. This is why we won't make a specific prediction for 2022. But we would like to state, that our scope has always been beyond the next 12 months. As part of VanEck's global business we take a long-term view on our business and despite the continued uncertainty, we remain confident that our strategy for the coming 5 years will prove sound and our US headquarters shares our view in that regard. For the next 12 months, we hope that our family, colleagues and clients will stay safe.

26April 2022,

The Board of Directors,

M. Rozemuller G. Koning

4.5 Notes

Accounting policies

General

VanEck was incorporated on 2 October 2009 (KVK: 34359726). The Company is an open-ended investment company with variable capital under Dutch law in the sense of article 2:76a of the Dutch Civil Code. This means that the Company will in principle issue, reissue, or purchase shares on request on any trading day. The Manager was granted a licence as referred to in section 2:65 Wft on 12 October 2009. The most recent prospectus from VanEck dates from 22 March 2022.

Compliance statement

The Company's financial statements have been prepared in accordance with IFRS (International Financial Reporting Standards), issued by the International Accounting Standards Board ('IASB') and accepted by the European Union and the requirements arising from the Financial Supervision Act and Book 2, Title 9 of the Dutch Civil Code, respectively. The Company's Financial statements have been prepared based on the Going Concern Assumption.

New standards, amendments and interpretations to existing standards which are relevant to the Fund and have been implemented during the reporting period

Amendments to IAS 1 and IAS 8 Definition of material - The amendments are intended to make the definition of material in IAS 1 easier to understand and are not intended to alter the underlying concept of materiality in IFRS Standards. The concept of 'obscuring' material information with immaterial information has been included as part of the new definition. The threshold for materiality influencing users has been changed from 'could influence' to 'could reasonably be expected to influence'. The definition of material in IAS 8 has been replaced by a reference to the definition of material in IAS 1. In addition, the IASB amended other Standards and the Conceptual Framework that contain a definition of material or refer to the term 'material' to ensure consistency. The amendments are applied prospectively for annual periods beginning on or after 1 January 2020, with earlier application permitted.

The adoption of the amendments listed above do not have a material impact on the financial statements of the Fund.

New standards, amendments and interpretations to existing standards which are relevant to the Fund and not yet effective

There are no new standards, amendments to standards or interpretations which are relevant to the Fund and not yet effective.

Use of assumptions and estimates

In preparing the financial statements, the Company must make assumptions and estimates that affect the items reported on the Statement of financial position and profit and loss account and the conditional receivables and liabilities as of the date of the annual report. The estimates and assumptions concerning current facts, events and, to a certain extent, future events and transactions have been made to the best knowledge of the management. The actual outcomes could ultimately deviate - possibly significantly - from these estimates.

Economic position

The accounting policies are aimed at setting out the Company's economic position. What is decisive for inclusion on the statement of financial position is whether the Fund runs a (positive or negative) risk on its own assets or the assets made available. If a transaction results in all future economic benefits and all risks relating to an asset or liability being transferred to a third party, the asset or the liability is no longer reported in the statement of financial position.

Measurement

At the moment of acquisition, assets and liabilities are valued at acquisition price, i.e. the fair value of the asset or liability. The investments are subsequently measured at fair value. The fair value is based on market value unless stated otherwise. The valuation at market value is based on the value for which the particular investments are listed on a stock market.

The other items are valued based on amortised cost, unless stated otherwise.

Netting

A financial asset and financial liability are netted and included on the statement of financial position as a net amount if there is a statutory or contractual authority to settle the asset and liability netted and simultaneously, at any point and unconditionally, and furthermore there is an intention to settle the items in this manner.

Functional and presentation currency

The presentation currency is the same as the functional currency, i.e. the euro. The shares of the Company and Sub-funds are listed in euros.

Foreign currency

Assets and liabilities denominated in foreign currencies are converted to euros at the spot exchange rate on the transaction date. This valuation is part of the valuation at current cost. Spot exchange rate differences of bank accounts are recognised under the indirect investment income in the profit and loss account.

Accounting policies for the statement of financial position

Investments

The financial investments are measured at fair value, unless stated otherwise. For the shares, bonds, structured products, and other fixed income securities included under financial investments, the fair value is determined based on the current market prices or other market listings. The fair value of the bonds are based on the clean value (without accrued interest). The accrued interest is included in the receivables.

The investments are designated as 'At fair value with changes in value through profit and loss'. All investments are held for trading purposes.

Upon first recognition, investments are valued at acquisition price, i.e. fair value, whereby the transaction costs are charged directly to the profit and loss account.

The fair value of investments is based on listed prices or derived from cash flow models. For the investments in investment institutions included under financial investments, the fair value is determined based on the current market prices. If these are not available, the fair value is determined based on the most recent net intrinsic value available. Unrealised and realised changes in value are recognised directly in the profit and loss account under investment result.

The fair values of financial instruments are determined on three levels. The financial instruments are all measured at level 1:

- Level 1: The fair values are based on listed prices on active markets. A financial instrument is considered listed on an active market if the listed price is available regularly and if these prices reflect the current and regularly occurring arm's-length market transactions;

Cash and cash equivalents

These are demand deposits in current account at banks. When a current account shows a negative amount it is considered unsubordinated debts to credit institutions and it is reported as a bank overdraft.

Receivables

The receivables are withholding tax receivables, current interest, receivables from entries not yet settled and other receivables. Receivables are valued at amortised cost. VanEck recognises an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that VanEck expects to receive, discounted at an approximation of the original effective interest rate.

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

For trade receivables, VanEck applies a simplified approach in calculating ECLs. Therefore, VanEck does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. VanEck has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Net assets attributable to shareholders

Shares in the Company, the Sub-funds, can be bought and sold on Euronext Amsterdam or other exchanges where the Sub-funds are listed, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. This is a market party that publishes prices throughout the trading day at which it is willing to buy or sell the shares in the Sub-funds. Other investors and market parties can also create additional liquidity. The role of the Liquidity Provider is to ensure there is enough liquidity on the market for both buyers and sellers of the shares in the Sub-funds. In connection with this, the Liquidity Provider has concluded an agreement with Euronext N.V. which includes the obligation for the Liquidity Provider to provide a two-way market consisting of bid and ask prices, to guarantee minimum turnover in the trade in a particular Sub-fund (expressed as a certain number of shares or amount in cash), and furthermore to set the market within a maximum bandwidth or spread (usually expressed as a percentage). The issued 'puttable instruments' are presented as liability in accordance with IAS 32.

Other payables

The other payables are management fees still payable. Other payables are initially recognised on fair value and subsequently measured at amortised cost.

Accounting policies for the statement of profit and loss and other comprehensive income

Dividend income

Dividends are recognized on the ex-dividend date.

Interest income and expense

The accrual of the bonds is taken into account in the valuation of the funds on a daily basis. VanEck is applying the nominal interest rate instead of effective interest method.

Changes in the value of investments

This is the indirect investment income from realised and unrealised changes in fair value and exchange rate differences. This income is recognised in the period to which it pertains.

Costs

Costs are recognised in the period in which they incur. The management costs for the investors in Sub-funds can vary per Sub-fund and are expressed as a percentage of the Net Intrinsic Value of every individual Sub-fund. For the height of the management costs of the particular Sub-fund, see the relevant Supplement. The management costs include all costs relating to the management of a Sub-fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs; these are not charged separately by the Sub-fund, therefore. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund.

Accounting policies for the statement of cash flows

Statement of cash flows

The statement of cash flows is prepared in accordance with the direct method whereby the operating receipts and expenditure is presented as such. Receipts and expenditure in relation to subscriptions and redemptions by participants are recognised as cash flow from financing activities. Purchases and sales have been presented as operating cash flow as this is the core business of the Fund. The cash and cash equivalents in the statement of cash flows include the demand deposits and bank overdrafts.

Notes to the statement of financial position and statement of profit and loss and other comprehensive income

1. Cash and cash equivalents

As of 31 December 2021, there are no restrictions on the use of the cash and cash equivalents. The cash is held at State Street Bank. Bank overdrafts are negative amounts on current accounts and are considered unsubordinated debts to credit institutions. The credit rating of State Street Bank is AA according to S&P as of 31 December 2021.

The Foreign exchange rates as of 31 December 2021 are as follows:

Foreign currency	31 December 2021	Average of 2021	31 December 2020	Average of 2020

4. Net assets attributable to shareholders

The company's authorised capital amounts to three million euros (EUR 3,000,000) divided into ten (10) priority shares and two hundred ninety-nine million nine hundred ninety-nine thousand nine hundred ninety (299,999,990) ordinary shares, divided into twenty-six (26) series of ordinary shares designated with the letters A to Z, each with nominal value of one cent (EUR 0.01). The issued capital and share premium are fully paid up. EUR 45,000 was issued and paid up on the Z shares (the company's foundation capital) and repaid in 2018. The Fund is not subject to other externally imposed capital requirements. The issued and paid-up capital per Sub-fund is disclosed in the summaries of the individual Sub-funds A, B, C, D E, F, G, H, I, J, K, L, M and N.

Capitalisation

The authorised capital of the Company amounts to € 3,000,000 divided into 299,999,990 ordinary shares and 10 priority shares, all with nominal value of € 0.01. The ordinary shares are divided into 26 series of shares. A series of shares is designated as a Sub-fund. The Board of Directors reserves the right to, if desired, open a new share series (not yet issued) in supplement to a Sub-fund already opened.

Issue and purchase of ordinary shares

The Company is an open-ended investment company. This means that the Board of Directors will, on request, issue shares and/or sell purchased shares at the transaction price of a share as determined at the moment of issue or sale. The transaction price corresponds to the Net Intrinsic Value of the particular share in a specific Sub-fund increased or decreased by transaction costs. The Board of Directors reserves the right to temporarily suspend the issue or purchase of shares. Suspension can take place, for instance, in cases in which the determination of the Net Intrinsic Value can also be suspended. Shares in the Company can be bought and sold on Euronext Amsterdam or other exchanges where the Sub-funds are listed, whereby the Liquidity Provider ensures that under normal circumstances, there is both a bid and ask price at which the share can be traded for the majority of the trading day.

Priority shares

The Company has issued 1 priority share to the Manager. The Priority has, among other things, rights in relation to the appointment, suspension, dismissal and determination of the remuneration and other employment conditions of directors of the Company. The Priority determines the number of members of the Board of Directors. For the appointment of a new director, within one month after having been invited to do so by the Board of Directors, it nominates at least 2 candidates from which the meeting of shareholders can appoint one. This nomination is binding for the meeting of shareholders unless this meeting deprives the nomination of its binding character in a resolution adopted by a majority of at least two-thirds of the votes cast, which represent more than half of the issued capital. A resolution to amend the Articles of Association, to merge, split or dissolve the Company can, other than at the proposal of the Priority, only be taken by the general meeting with a majority of at least two-thirds of the votes cast representing more than half of the issued capital.

Dividend policy

Pursuant to its status as fiscal investment institution, the Company will, within eight months of the conclusion of the financial year, pay out to the shareholders as dividend the taxable profit available for distribution, less the distribution deficits from previous years to be set off. The dividend is determined individually per Sub-fund.

The height of the dividend varies per Sub-fund and is based on a combination of the dividend and the coupons paid out on the shares or bonds, respectively, which form the Underlying Securities of the particular Sub-fund. The dividend is paid out in cash. The Company in principle intends to pay out (interim) dividend four times per calendar year.

5. Summary of changes in the net asset value

(amounts x € 1)	2021	2020
Opening balance	1,060,337,072	2,126,602,432
Issue of shares	1,018,498,741	719,293,630
Purchase of shares	(672,458,148)	(1,615,098,800)
Distribution	(23,709,803)	(39,212,152)
Interest income	2,552,093	6,015,666
Interest expense	(2,255)	(84,509)
Dividend income	24,539,317	32,769,523
Changes in the value of investments	251,260,812	(166,142,138)
Management fee	(3,261,718)	(3,432,012)
Exchange rate differences	(32,744)	(350,877)
Other income/expenses	(164,142)	(23,691)
Closing balance	1,657,559,225	1,060,337,072

6. Risks with regard to the financial instruments

Financial risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset.

The Investment Manager may attempt to mitigate this risk by using financial derivative instruments. In accordance with each Sub-Fund's policy, the Investment Manager monitors each Sub-Fund's currency exposures on a daily basis and reports monthly to the designated person and to the Board of Directors, which reviews the information provided by the Investment Manager on any significant exposures at its periodic meetings.

The Sub-funds VanEck AEX UCITS ETF, VanEck AMX UCITS ETF, VanEck iBoxx EUR Corporates UCITS ETF, VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF and VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF are only invested in euro.

The Sub-funds VanEck Multi-Asset Conservative Allocation UCITS ETF, VanEck Multi-Asset Balanced Allocation UCITS ETF, VanEck Multi-Asset Growth Allocation UCITS ETF, VanEck Global Equal Weight UCITS ETF, VanEck Global Real Estate UCITS ETF, VanEck Sustainable World Equal Weight UCITS ETF, VanEck European Equal Weight UCITS ETF, VanEck Morningstar North America Equal Weight UCITS ETF and VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF, are invested in multiple currencies, which are indeed exposed to currency risk; the currency risk is not hedged.

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by sector and region.

Portfolio distribution by sector

Interest rate risk

The Company invests in fixed-interest financial instruments and is consequently exposed to interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company is subject to interest rate risk on its debt securities and cash including margin cash held with brokers and may have an indirect exposure to interest rate risk through investments into financial derivative instruments whereby the value of the underlying asset may fluctuate as a result of a change in interest rates. Generally, the value of fixed income securities will change inversely with changes in interest rates, the effect being greater the longer the maturity of the security.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depository. Investments in equity securities are not exposed to credit risk except for exposure to the Depository.

The Company's Depository is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depository. Bankruptcy or insolvency of the Depository or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depository to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depository through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company. The amount that best represents the maximum credit risk is € 202,973,564 (2020: € 281,498,721).

The Company invests in monetary financial instruments and is consequently exposed to significant credit risk.

(amounts x € 1)	2021		2020	
Credit rating	Amount	% of NAV	Amount	% of NAV
AAA	50,911,735	3.1	85,991,850	8.1

Total	202,973,564	12.3	281,498,721	26.5

Liquidity risk

Liquidity risk is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term. Shares in the Sub-funds can be bought and sold on Euronext Amsterdam or other exchanges where the Sub-funds are listed, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The Fund's investments are likewise listed. Consequently, the company is not exposed to significant liquidity risk.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

7. Other payables

(amounts x € 1)	2021	2020
Interest payable	-	1,523
Management costs payable	331,088	211,153
Dividend tax payable	743,267	1,063,287
Securities transactions still to be settled	1,606,481	-
Payable for shares redeemed	-	2,228,071

Total	2,680,836	3,568,069

The other short-term debts relate to redemptions. All other payables will be settled in less than 1 year.

8. Related parties

A party is a related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company. The Company has no employees.

The management costs for the investors in Sub-funds can vary per Sub-fund and are expressed as a percentage of the net intrinsic value of every individual Sub-fund. The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 3,261,718 (2020: € 3,432,012).

Ongoing charges figure (OCF)

The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, except for the spread applied for entering and exiting participants, any performance fees and transaction costs of investments and interest charges on bank accounts.

The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period. The OCF per Sub-fund is disclosed in the notes to the financial statements for each Sub-fund.

Portfolio turnover ratio (PTR)

The PTR for the assets per Sub-fund is disclosed in the notes to the financial statements for each Sub-fund.

Auditor's fee

The manager charges an overall cost allowance. The manager pays the auditor's fee from the cost allowance. The auditor's fee charged to the manager for 2021 as a whole amounts to € 91,160 excluding VAT (2020 as a whole: € 91,000) for the audit of the financial statements and € 9.540 (2020 as a whole € 4,000) excluding VAT for the assurance procedures for the supervisory authority ensuring that the UCITS provisions from the Market Conduct Supervision (Financial Institutions) Decree are satisfied. The auditor's fee cannot be further quantified on the level of each Sub-fund and is therefore not disclosed in further detail in the financial statements for the Sub-funds.

Other notes

Distribution after the statement of financial position date

The Distributions for the 2021 financial year took place in 2021; as such, the distribution requirement was satisfied. No final dividend will be paid out.

Personnel

The company did not employ any personnel during the reporting period.

Fiscal status

The Company is a public company with registered office in Amsterdam, incorporated under Dutch law. The Company opts for the status of fiscal investment institution (FII) as referred to in section 28 of the Corporation Tax Act 1969. An FII is subject to a 0% rate for the levy of corporation tax if certain conditions are satisfied.

Securities borrowing and lending

The Sub-funds do not lend out any securities.

Return commissions and soft commissions

There were no return commissions or soft commissions during the reporting period.

Outsourcing of tasks

VanEck outsources many of its tasks to third parties. This allows the organisation to remain small. VanEck is still always responsible for the performance of these tasks.

The outsourced tasks and responsibilities are set out below:

Process	Outsourced to
Investment accounting	State Street Bank International GmbH Amsterdam Branch
Financial administration umbrella structure	State Street Bank International GmbH Amsterdam Branch
Calculation and submission of NAV and iNAV	Indexproviders Euronext, Markit and Solactive
Preparation and sending of compo file	State Street Bank international GmbH Amsterdam Branch
Preparation and sending of DRA reports to DNB	Solutional

Subsequent events

Russia's invasion of Ukraine and corresponding events in late February 2022, have caused volatility on regional and global economic markets for securities and commodities. The risk arising to the Sub-funds is low. Management are closely monitoring global financial markets and following Russia's actions, various governments have issued broad-ranging economic sanctions against Russia. The Russian invasion has sparked a chain of events that have increased uncertainty and presents challenges to the outlook for inflation and in particular energy related inflation.

On 22 March 2022 a new prospectus was published containing updates on the name change of the fund range and ESG policy.

On 25 January VanEck Morningstar North America Equal Weight UCITS ETF was liquidated. As a result of the small size of the fund it was no longer profitable.

VanEck AEX UCITS ETF

VanEck®

Access the opportunities.

General information

Investment policy

The aim of the VanEck AEX UCITS ETF is to follow the AEX index® (the 'AEX®') as closely as possible. The AEX® is the index made up of the 25 largest listed stocks on Euronext Amsterdam N.V. As such the AEX® reflects the performance of Dutch blue chips and is a good indicator of the Dutch market as a whole.

The weight taken up by a share in the AEX® is determined with reference to the market capitalisation: the greater a company's market capitalisation, the greater its weight in the AEX®. A maximum of 15% applies per listed stock. The market capitalisation is calculated by multiplying a share's price by the number of issued shares. For the sake of tradability, only the number of freely tradable shares, the so-called 'free float', is included in the calculation. Locked-in shares are left out of consideration. The AEX® is reweighted at least once a year.

The VanEck AEX UCITS ETF will likewise be reweighted annually in order to be brought back in line with the (annually) reweighted AEX®. Costs incurred in connection with the reweighting of VanEck AEX UCITS ETF are at the expense of this Sub-fund.

Repurchase of redeemable participating shares	(400,000)	(1,075,000)
Redeemable participating shares at the end of the financial year	3,090,000	2,990,000

4.6.5. Notes**Accounting policies**

For the accounting policies used for the financial statements, refer to the Company's accounting policies as set out in chapter 4.5.

Notes to the statement of financial position and statement of profit and loss and other comprehensive income**1. Cash and cash equivalents**

At 31 December 2021 there are no restrictions on the use of the cash and cash equivalents. When a current account shows a negative amount it is considered unsubordinated debts to credit institutions and it is reported as a bank overdraft.

2. Investments**Summary of changes in the investments according to characteristic of financial instrument**

(amounts x € 1)	2021	2020
Equity instruments		
Opening balance	186,617,777	168,921,170
Purchases of investments	73,258,631	80,286,310
Sales of investments	(65,524,193)	(78,526,748)
Changes in value	52,196,409	15,937,045
closing balance equity instruments	246,548,624	186,617,777

The table below provides an analysis of the financial instruments measured at fair value, per valuation method.

Composition of investments according to valuation technique

(amounts x € 1)	2021	2020
Level 1	246,548,624	186,617,777
Total	246,548,624	186,617,777

All the investments of the Sub-fund are listed and therefore classified as level 1 investments.

Interest payable	-	69
Management costs payable	61,184	47,865
Other short-term debts	-	425
Total	61,184	48,359

5. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 661,030 (same period in 2020: € 537,202).

6. Risks with regard to the financial instruments**Financial risk**

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset.

The Sub-fund only has euro investments and is consequently not exposed to significant currency risk.

VanEck AEX UCITS ETF

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by sector and region.

Portfolio distribution by sector

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Non-cyclical consumer goods	96,010,763	38.8	78,036,398	41.8	
Technology	40,821,507	16.6	33,956,008	18.2	
Communications	32,203,696	13.1	18,703,285	10.0	
Energy	25,131,347	10.2	19,748,278	10.6	
Financial	21,581,808	8.8	18,212,064	9.8	
Basic Materials	21,087,899	8.6	17,961,744	9.6	
Cyclical consumer goods	8,229,863	3.3	-	0.0	
Industrial	1,481,741	0.6	-	0.0	
Total	246,548,624	100.0	186,617,777	100.0	

A 5% increase in the relevant sector, starting on the statement of financial position date and applicable for every sector, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Non-cyclical consumer goods	4,800,538	1.9	3,901,820	2.1	
Technology	2,041,075	0.8	1,697,800	0.9	
Communications	1,610,185	0.7	935,164	0.5	
Energy	1,256,567	0.5	987,414	0.5	
Financial	1,079,090	0.4	910,603	0.5	
Basic Materials	1,054,395	0.4	898,087	0.5	
Cyclical consumer goods	411,493	0.2	-	0.0	
Industrial	74,087	0.0	-	0.0	

A 5% decrease in the sector would have an impact of the same magnitude in the opposite direction.

Interest rate risk

The Sub-fund does not invest in fixed-interest financial instruments and is consequently not exposed to significant interest rate risk.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

VanEck AEX UCITS ETF

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company. Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 67,575 (2020: € 11,212).

The Sub-fund does not invest in monetary financial instruments and is consequently not exposed to significant credit risk.

Liquidity risk

Liquidity risk is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term. Shares in the Sub-funds can be bought and sold on Euronext Amsterdam or other exchanges where the Sub-funds are listed, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The Fund's investments are likewise listed. Consequently, the company is not exposed to significant liquidity risk. The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

7. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	220,410,451	179,065,093
Total costs within the Sub fund	661,030	537,202
OCF	0.30%	0.30%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	661,030	0.30%	0.30%

The percentage is calculated with respect to the average assets as used for the OCF.

VanEck AEX UCITS ETF

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

A PTR of 33.1% is calculated using this formula (2020: 21.4%). This means that in 2021, purchases and sales took place in the amount of 0.3 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

Access the opportunities.

General information

Investment policy

The aim of the VanEck AMX UCITS ETF is to follow the AMX index® (the 'AMX®') as closely as possible. The AMX® is the index made up of the 25 largest listed stocks on Euronext Amsterdam N.V. after the listed stock traded on the AEX index®. As such the AMX® is a good indicator of the performance of medium-sized Dutch businesses.

The weight taken up by a share in the AMX® is determined with reference to the market capitalisation: the greater a company's market capitalisation, the greater its weight in the AMX®. A maximum of 15% applies per listed stock. The market capitalisation is calculated by multiplying a share's price by the number of issued shares. For the sake of tradability, only the number of freely tradable shares, the so-called 'free float', is included in the calculation. Locked-in shares are left out of consideration. The AMX® is reweighted at least once a year.

The VanEck AMX UCITS ETF will likewise be reweighted annually in order to be brought back in line with the (annually) reweighted AMX®. The costs incurred in connection with the reweighting of the VanEck AMX UCITS ETF are at the expense of this Sub-fund.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 100,052 (same period in 2020: € 88,913).

VanEck AMX UCITS ETF

7. Risks with regard to the financial instruments**Financial risk**

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset.

The Sub-fund only has euro investments and is consequently not exposed to significant currency risk.

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices.

The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Financial	8,606,113	34.1	3,258,090	12.3	
Industrial	8,158,569	32.3	8,067,647	30.5	
Non-cyclical consumer goods	3,290,316	13.0	5,660,154	21.4	
Energy	2,016,375	8.0	3,066,980	11.6	
Basic Materials	1,737,663	6.9	1,623,279	6.1	
Cyclical consumer goods	1,449,159	5.7	1,283,975	4.8	
Technology	-	0.0	1,906,054	7.2	
Communications	-	0.0	1,612,748	6.1	
Total	25,258,195	100.0	26,478,927	100.0	

VanEck AMX UCITS ETF

A 5% increase in the relevant sector, starting on the statement of financial position date and applicable for every sector, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)	2021		2020	
Sector	Amount	the NAV	Amount	the NAV
Financial	430,306	1.7	162,905	0.6
Industrial	407,928	1.6	403,382	1.5
Non-cyclical consumer goods	164,516	0.7	283,008	1.1
Energy	100,819	0.4	153,349	0.6
Basic Materials	86,883	0.3	81,164	0.3
Cyclical consumer goods	72,458	0.3	64,199	0.2
Technology	-	0.0	95,303	0.4
Communications	-	0.0	80,637	0.3

A 5% decrease in the sector would have an impact of the same magnitude in the opposite direction.

Interest rate risk

The Sub-fund does not invest in fixed-interest financial instruments and is consequently not exposed to significant interest rate risk.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company.

Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 27,646 (2020: € 28,261)

The Sub-fund does not invest in monetary financial instruments and is consequently not exposed to significant credit risk.

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

VanEck AMX UCITS ETF

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	28,577,807	25,460,317
Total costs within the Sub fund	100,052	88,913
OCF	0.35%	0.35%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	100,052	0.35%	0.35%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 52.1% is calculated using this formula (2020: 77.4%). This means that in 2021, purchases and sales took place in the amount of 0.5 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

Repurchase of redeemable participating shares	(40,000)	(60,000)
Redeemable participating shares at the end of the financial year	358,000	248,000

4.8.5. Notes**Accounting policies**

For the accounting policies used for the financial statements, refer to the Company's accounting policies as set out in chapter 4.5.

Notes to the statement of financial position and statement of profit and loss and other comprehensive income**1. Cash and cash equivalents**

At 31 December 2021 there are no restrictions on the use of the cash and cash equivalents. When a current account shows a negative amount it is considered unsubordinated debts to credit institutions and it is reported as a bank overdraft.

The Foreign exchange rates as of 31 December 2021 are as follows:

Foreign currency	31 December 2021	Average of 2021	31 December 2020	Average of 2020
AUD	1.5641	1.5745	1.5856	1.6534
CAD	1.4365	1.4829	1.5588	1.5290
CHF	1.0361	1.0813	1.0816	1.0702
DKK	7.4375	7.4370	7.4435	7.4542
GBP	0.8396	0.8597	0.8951	0.8889

SGD	1.5331	1.5892	1.6171	1.5728
USD	1.1372	1.1829	1.2236	1.1400
ZAR	18.1495	17.4859	17.9725	18.6709

2. Investments

Summary of changes in the investments according to characteristic of financial instrument

(amounts x € 1)	2021	2020
Equity instruments		
Opening balance	4,689,409	4,250,437
Purchases of investments	3,358,298	2,084,544
Sales of investments	(2,341,367)	(1,371,760)
Changes in value	1,504,965	(273,812)
closing balance equity instruments	7,211,305	4,689,409
Bonds		
Opening balance	10,095,303	8,881,863
Purchases	8,967,069	4,204,682
Sales	(3,354,771)	(3,166,440)
Changes in value	(407,615)	175,198
closing balance bonds	15,299,986	10,095,303
Total investments		
Opening balance	14,784,712	13,132,300
Purchases	12,325,367	6,289,226
Sales	(5,696,138)	(4,538,200)
Changes in value	1,097,350	(98,614)
Closing balance total investments	22,511,291	14,784,712

The table below provides an analysis of the financial instruments measured at fair value, per valuation method.

Composition of investments according to valuation technique

(amounts x € 1)	2021	2020
Level 1	22,511,291	14,784,712
Total	22,511,291	14,784,712

All the investments of the Sub-fund are listed and therefore classified as level 1 investments.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 53,679 (same period in 2020: € 40,729).

VanEck Multi-Asset Conservative Allocation UCITS ETF

7. Risks with regard to the financial instruments**Financial risk**

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset.

The Investment Manager may attempt to mitigate this risk by using financial derivative instruments. In accordance with each Sub-Fund's policy, the Investment Manager monitors each Sub-Fund's currency exposures on a daily basis and reports monthly to the designated person and to the Board of Directors, which reviews the information provided by the Investment Manager on any significant exposures at its periodic meetings.

The fund has investments denominated in foreign currency and is therefore exposed to significant currency risk.

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)		2021		2020

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

VanEck Multi-Asset Conservative Allocation UCITS ETF

Interest rate risk

The company invests in fixed-interest financial instruments and is consequently exposed to interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company is subject to interest rate risk on its debt securities and cash including margin cash held with brokers and may have an indirect exposure to interest rate risk through investments into financial derivative instruments whereby the value of the underlying asset may fluctuate as a result of a change in interest rates. Generally, the value of fixed income securities will change inversely with changes in interest rates, the effect being greater the longer the maturity of the security.

	2021		2020	
	Modified Duration	Amount	Modified Duration	Amount
Bonds	5.81	889,308	6.29	634,724

The modified duration expresses the bonds value's sensitivity to a 100 basis point change in interest rates. The effect on the amount is the opposite to the change in interest rate. If the interest rate increases (decreases) the amount of the bonds will decrease (increase). The higher the modified duration, the higher the (opposite) effect on the amount of the bonds.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company.

Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 15,552,826 (2020: € 10,160,432).

VanEck Multi-Asset Conservative Allocation UCITS ETF

The fund invests in monetary financial instruments and is consequently exposed to significant credit risk. The table below shows the concentrations of credit risk of the investments in bonds.

(amounts x € 1)	2021		2020	
Credit rating	Amount	% of NAV	Amount	% of NAV
AAA	2,797,371	12.3	1,877,181	12.6

BB	26,127	0.1	26,010	0.2
No rating	305,618	1.3	-	0.0
Total	15,299,986	67.2	10,095,303	68.0

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	19,180,786	14,561,005
Total costs within the Sub fund	53,679	40,729
OCF	0.28%	0.28%

VanEck Multi-Asset Conservative Allocation UCITS ETF

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	53,679	0.28%	0.28%

The percentage is calculated with respect to the average assets as used for the OCF. **Portfolio Turnover ratio**

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 32.8% is calculated using this formula (2020: 18.2%). This means that in 2021, purchases and sales took place in the amount of 0.3 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

VanEck Multi-Asset Balanced Allocation UCITS ETF

General Information

Investment policy

The aim of the VanEck Multi-Asset Balanced Allocation UCITS ETF is to follow the Indices below as closely as possible, in the ratios indicated here:

- 25% Markit iBoxx EUR Liquid Sovereign Diversified 1-10 Index
- 25% Markit iBoxx EUR Liquid Corporates Index
- 40% Solactive Global Equity Index
- 10% GPR Global 100 Index

The allocation across the Indices is reweighted annually on the first Tuesday in September, so that the allocation is brought back in line with the original ratios. The costs incurred in connection with the reweighting of the VanEck Multi-Asset Balanced Allocation UCITS ETF are at the expense of this Sub-fund.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 81,970 (same period in 2020: € 70,743).

7. Risks with regard to the financial instruments

Financial risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Other price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

VanEck Multi-Asset Balanced Allocation UCITS ETF

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset.

The fund has investments denominated in foreign currency and is therefore exposed to significant currency risk.

(amounts x € 1)	2021		2020	
Currency	Amount	% of NAV	Amount	% of NAV
Euro	17,560,864	57.0	14,018,969	59.0

Norwegian Krone	-	0.0	35	0.0

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

VanEck Multi-Asset Balanced Allocation UCITS ETF

Market risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)		2021		2020

Other countries		433,006 1.4	324,554 1.4	

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

VanEck Multi-Asset Balanced Allocation UCITS ETF

Interest rate risk

The company invests in fixed-interest financial instruments and is consequently exposed to interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company is subject to interest rate risk on its debt securities and cash including margin cash held with brokers and may have an indirect exposure to interest rate risk through investments into financial derivative instruments whereby the value of the underlying asset may fluctuate as a result of a change in interest rates. Generally, the value of fixed income securities will change inversely with changes in interest rates, the effect being greater the longer the maturity of the security.

2021			2020	
	Modified Duration	Amount	Modified Duration	Amount
Bonds	5.21	759,063	6.29	714,733

The modified duration expresses the bonds value's sensitivity to a 100 basis point change in interest rates. The effect on the amount is the opposite to the change in interest rate. If the interest rate increases (decreases) the amount of the bonds will decrease (increase). The higher the modified duration, the higher the (opposite) effect on the amount of the bonds.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ("S&P") rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company.

Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 14,855,705 (2020: € 11,084,364).

VanEck Multi-Asset Balanced Allocation UCITS ETF

The fund invests in monetary financial instruments and is consequently exposed to significant credit risk. The table below shows the concentrations of credit risk of the investments in bonds.

(amounts x € 1)		2021		2020	
Credit rating	Amount	% of NAV	Amount	% of NAV	
AAA	2,988,695	9.7	1,694,062	7.1	
AA	3,666,789	11.9	3,280,530	13.8	
A	3,176,160	10.3	2,375,708	10.0	
BBB	4,278,814	13.9	3,878,497	16.3	
BB	104,509	0.3	104,040	0.4	
B	-	0.0	35,019	0.1	
No rating	358,119	1.2	-	0.0	
Total	14,573,086	47.3	11,367,856	47.7	

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)		2021	2020
Average intrinsic value		27,333,352	23,591,206
Total costs within the Sub fund		81,970	70,743
OCF		0.30%	0.30%

VanEck Multi-Asset Balanced Allocation UCITS ETF

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	81,970	0.30%	0.30%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 31.9% is calculated using this formula (2020: 29.0%). This means that in 2021, purchases and sales took place in the amount of 0.3 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

VanEck Multi-Asset Growth Allocation UCITS ETF

General Information

Investment policy

The aim of the VanEck Multi-Asset Growth Allocation UCITS ETF is to follow the Indices below as closely as possible, in the ratios indicated here:

- 15% Markit iBoxx EUR Liquid Sovereign Diversified 1-10 Index
- 15% Markit iBoxx EUR Liquid Corporates Index
- 60% Solactive Global Equity Index
- 10% GPR Global 100 Index

The allocation across the Indices is reweighted annually on the first Tuesday in September, so that the allocation is brought back in line with the original ratios. The costs incurred in connection with the reweighting of the VanEck Multi-Asset Growth Allocation UCITS ETF are at the expense of this Sub-fund.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 65,523 (same period in 2020: € 45,792).

VanEck Multi-Asset Growth Allocation UCITS ETF

7. Risks with regard to the financial instruments

Financial risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset.

The fund has investments denominated in foreign currency and is therefore exposed to significant currency risk.

(amounts x € 1)		2021		2020

Norwegian Krone	-	0.0	41	0.0	

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

VanEck Multi-Asset Growth Allocation UCITS ETF

Interest rate risk

The company invests in fixed-interest financial instruments and is consequently exposed to interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company is subject to interest rate risk on its debt securities and cash including margin cash held with brokers and may have an indirect exposure to interest rate risk through investments into financial derivative instruments whereby the value of the underlying asset may fluctuate as a result of a change in interest rates. Generally, the value of fixed income securities will change inversely with changes in interest rates, the effect being greater the longer the maturity of the security.

2021			2020	
	Modified Dutation	Amount	Modified Dutation	Amount
Bonds	6.16	379,267	6.29	275,415

The modified duration expresses the bonds value's sensitivity to a 100 basis point change in interest rates. The effect on the amount is the opposite to the change in interest rate. If the interest rate increases (decreases) the amount of the bonds will decrease (increase). The higher the modified duration, the higher the (opposite) effect on the amount of the bonds.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depository. Investments in equity securities are not exposed to credit risk except for exposure to the Depository.

The Company's Depository is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depository. Bankruptcy or insolvency of the Depository or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depository to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depository through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company.

Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 6,285,118 (2020: € 4,435,861).

VanEck Multi-Asset Growth Allocation UCITS ETF

The Sub-fund invests in monetary financial instruments and is consequently exposed to significant credit risk. The table below shows the concentrations of credit risk of the investments in bonds.

(amounts x € 1)		2021		2020	
Credit rating	Amount	% of NAV	Amount	% of NAV	
AAA	1,007,757	4.6	646,754	4.2	
AA	1,944,488	8.8	977,461	6.3	
A	1,229,601	5.6	1,140,113	7.4	
BBB	1,929,279	8.7	1,616,152	10.5	
No rating	135,421	0.6	-	0.0	
Total	6,246,546	28.3	4,380,480	28.4	

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)		2021	2020
Average intrinsic value		20,480,930	14,313,128
Total costs within the Sub fund		65,523	45,792
OCF		0.32%	0.32%

VanEck Multi-Asset Growth Allocation UCITS ETF

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	53,679	0.28%	0.28%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 30.0% is calculated using this formula (2020: 33.8%). This means that in 2020, purchases and sales took place in the amount of 0.3 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

VanEck Global Equal Weight UCITS ETF

General Information

Investment policy

The aim of the VanEck Global Equal Weight UCITS ETF is to follow the Solactive Global Equity Index as closely as possible.

The (general) criteria below apply to the (composition of the) Solactive Global Equity Index:

- first shares are selected with a primary stock-market listing in developed countries worldwide, as described in the 'Solactive Global Equity Index Guideline';
- exclusively ordinary and preferred shares and Depositary Receipts are eligible;
- Limited Partnerships and shares listed in Hong Kong that achieve more than 75% of their turnover outside the specified developed countries are excluded;
- exclusively shares with semi-annual average trading volume of EUR 25 million per day are eligible;
- only the most liquid listing for each company is eligible;
- the 250 largest shares are then selected based on free float market capitalisation;
- the Index is equally weighted on the reweighting date, after that the weighting can vary due to price fluctuations;
- the Index is reweighted annually on the third Tuesday of March so that the 250 shares are again equally weighted. Shares can also be added or removed. If this is not a Trading Day, the reweighting takes place on the next Trading Day; and
- for each geographic region, the weighting in the Index is capped at 40% at the moment of reweighting.

Total	-	455,424

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 425,989 (same period in 2020: € 1,014,920).

VanEck Global Equal Weight UCITS ETF

7. Cost section

OCF (ongoing charges figure)

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	08-10-2021	2020
Average intrinsic value	287,408,195	593,438,494
Total costs within the Sub fund	425,989	1,014,920
OCF	0.15%	0.17%

Comparison of costs to prospectus over the financial year from 1st of January 2021 to 8th October 2021

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	425,989	0.15%	0.17%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

A PTR of 102.7% is calculated using this formula (2020: 34.0%). This means that in 2021, purchases and sales took place in the amount of 1 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits. The figure is distorted as a result of the liquidation of the fund.

VanEck Global Real Estate UCITS ETF

General Information

Investment policy

The aim of the VanEck Global Real Estate UCITS ETF is to follow the GPR Global 100 Index as closely as possible.

The (general) criteria below apply to the (composition of the) GPR Global 100 Index:

- the index is based on 100 leading property companies in the world and represents 70-80% of the worldwide (investible) property market capitalisation;
- the index consists of 40 property shares from America, 30 property shares from Asia and 30 property shares from Europe, the Middle East and Africa;
- for every region, the shares are selected on the basis of liquidity measured over the past year;
- the index uses a weighting method based on freely tradable market capitalisation;
- the index is reweighted semi-annually on the third Friday of March and September. Shares can also be added or removed with the reweighting. If this is not a Trading Day, the reweighting takes place on the next Trading Day; and
- the weighting in the index is capped at 20% per share. If just one share exceeds this 20%, the maximum for this one share can be increased to 35%.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 685,707 (same period in 2020: € 384,007).

VanEck Global Real Estate UCITS ETF

7. Risks with regard to the financial instruments

Financial risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset.

The fund has investments denominated in foreign currency and is therefore exposed to significant currency risk.

(amounts x € 1)		2021		2020	
Currency	Amount	% of NAV	Amount	% of NAV

VanEck Global Real Estate UCITS ETF

A 5% increase in the relevant currency, starting on the statement of financial position date and applicable for every currency, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)				
2021			2020	
Currency	Amount	% of NAV	Amount	% of NAV
US dollar	18,305,358	3.3	2,679,937	2.8
Japanese Yen	2,991,466	0.5	641,137	0.7
Pound sterling	1,175,000	0.2	199,896	0.2
Australian dollar	1,057,773	0.2	204,781	0.2
Hong Kong dollar	805,612	0.1	166,145	0.2
Singapore Dollar	610,793	0.1	132,855	0.1
Swedish Krona	538,023	0.1	84,263	0.1
Swiss Franc	273,367	0.1	59,400	0.1
Canadian dollar	134,981	0.0	50,808	0.1
South-African Rand	112,086	0.0	20,240	0.0
Brazilian real	42,122	0.0	-	0.0
Norwegian Krone	37,702	0.0	-	0.0

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

Market risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)				
2021			2020	
Sector	Amount	% of NAV	Amount	% of NAV
Financial	548,987,971	97.9	93,432,457	96.9
Other sectors	10,052,614	1.8	2,720,477	2.8
Total	559,040,585	99.7	96,152,934	99.7

A 5% increase in the relevant sector, starting on the statement of financial position date and applicable for every sector, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)				
2021			2020	
Sector	Amount	% of NAV	Amount	% of NAV
Financial	27,449,399	4.9	4,671,623	4.8
Other sectors	502,631	0.1	136,024	0.1

A 5% decrease in the sector would have an impact of the same magnitude in the opposite direction.

VanEck Global Real Estate UCITS ETF

Portfolio distribution by country

The Company may invest in securities of issuers located in various countries and geographic regions. The economies of individual countries may differ favorably or unfavorably from each other in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position.

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
United states of America	364,645,786	65.0	53,570,461	55.6	
Japan	59,691,774	10.6	12,822,474	13.3	
Germany	24,695,959	4.4	7,948,589	8.2	
Other countries	110,007,066	19.7	21,811,410	22.6	
Total	559,040,585	99.7	96,152,934	99.7	

Country risk relates to uncertainty associates with investing in a certain country, which may be caused by political, economic, or technological influences. A 5% increase in the relevant country, starting on the statement of financial position date and applicable for every country, would result in a profit for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
United states of America	18,232,289	3.2	2,678,523	2.8	
Japan	2,984,589	0.5	641,124	0.7	
Germany	1,234,798	0.2	397,429	0.4	
Other countries	5,500,353	1.0	1,090,571	1.1	

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

Interest rate risk

The Sub-fund does not invest in fixed-interest financial instruments and is consequently not exposed to significant interest rate risk.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company.

VanEck Global Real Estate UCITS ETF

Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 2,443,504 (2020: € 427,655).

The Sub-fund does not invest in monetary financial instruments and is consequently not exposed to significant credit risk.

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	275,087,951	153,032,702
Total costs within the Sub fund	685,707	384,007
OCF	0.25%	0.25%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	685,707	0.25%	0.25%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 30.8% is calculated using this formula (2020: 17.3%). This means that in 2021, purchases and sales took place in the amount of 0.3 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

General Information

Investment policy

The aim of the VanEck iBoxx EUR Corporates UCITS ETF, Sub-fund H of VanEck ETFs N.V., is to follow the Markit iBoxx EUR Liquid Corporates Index as closely as possible.

The (general) criteria below apply to the (composition of the) Markit iBoxx EUR Liquid Corporates Index:

- the index consists of maximum 40 corporate bonds. These must be investment grade;
- zero coupon bonds, exotic bonds and callable bonds are excluded from selection for the index. These are plain vanilla bonds;
- the minimum remaining maturity is eighteen months;
- The minimum issue is 750 million euros;
- a maximum of one bond per company is selected;
- the reweighting takes place on the last day of February, May, August and November. The costs incurred in connection with the reweighting of the VanEck iBoxx EUR Corporates UCITS ETF are at the expense of this Sub-fund.
- the weighting is on the basis of the outstanding amount of the bonds.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 74,036 (same period in 2020: € 169,727).

VanEck iBoxx EUR Corporates UCITS ETF

7. Risks with regard to the financial instruments

Market risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The Sub-fund only has euro investments and is consequently not exposed to significant currency risk.

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Financial	18,938,765	40.7	18,270,173	38.1	
Non-cyclical consumer goods	9,509,371	20.4	9,990,485	20.8	
Cyclical consumer goods	5,415,176	11.6	6,851,288	14.3	
Industrial	4,546,031	9.8	4,587,355	9.6	
Communications	2,940,190	6.3	3,113,638	6.5	
Other sectors	4,744,162	10.3	4,776,107	10.0	
Total	46,093,695	99.1	47,589,046	99.3	

VanEck iBoxx EUR Corporates UCITS ETF

A 5% increase in the relevant sector, starting on the statement of financial position date and applicable for every sector, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Financial	946,938	2.0	913,509	1.9	
Non-cyclical consumer goods	475,469	1.0	499,524	1.0	
Cyclical consumer goods	270,759	0.6	342,564	0.7	
Industrial	227,302	0.5	229,368	0.5	
Communications	147,010	0.3	155,682	0.3	
Other sectors	237,208	0.5	238,805	0.5	

A 5% decrease in the sector would have an impact of the same magnitude in the opposite direction.

Portfolio distribution by country

The Company may invest in securities of issuers located in various countries and geographic regions. The economies of individual countries may differ favorably or unfavorably from each other in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position.

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
United states of America	15,560,611	33.5	10,247,693	21.4	
Germany	14,379,346	30.9	11,137,077	23.3	
United Kingdom	3,475,767	7.5	2,498,679	5.2	
Netherlands	1,102,139	2.4	6,830,025	14.2	
Luxembourg	-	0.0	6,376,673	13.3	
Other countries	11,575,832	24.9	10,498,899	21.9	
Total	46,093,695	99.1	47,589,046	99.3	

VanEck iBoxx EUR Corporates UCITS ETF

Country risk relates to uncertainty associates with investing in a certain country, which may be caused by political, economic, or technological influences. A 5% increase in the relevant country, starting on the statement of financial position date and applicable for every country, would result in a profit for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
United states of America	778,031	1.7	512,385	1.1	
Germany	718,967	1.5	556,854	1.2	
United Kingdom	173,788	0.4	124,934	0.3	
Netherlands	55,107	0.1	341,501	0.7	
Luxembourg	-	0.0	318,834	0.7	
Other countries	578,792	1.2	524,945	1.1	

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

Interest rate risk

The Company invests in fixed-interest financial instruments and is consequently exposed to interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company is subject to interest rate risk on its debt securities and cash including margin cash held with brokers and may have an indirect exposure to interest rate risk through investments into financial derivative instruments whereby the value of the underlying asset may fluctuate as a result of a change in interest rates. Generally, the value of fixed income securities will change inversely with changes in interest rates, the effect being greater the longer the maturity of the security.

Total	83,145	23,226,987	24,362,059	(47,672,191)	-

	2021		2020	
	Modified Duration	Amount	Modified Duration	Amount
Bonds	5.15	2,375,824	5.43	2,585,135

The modified duration expresses the bonds value's sensitivity to a 100 basis point change in interest rates. The effect on the amount is the opposite to the change in interest rate. If the interest rate increases (decreases) the amount of the bonds will decrease (increase). The higher the modified duration, the higher the (opposite) effect on the amount of the bonds.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

VanEck iBoxx EUR Corporates UCITS ETF

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company. Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 46,523,295 (2020: € 47,976,109).

The Sub-fund invests in monetary financial instruments and is consequently exposed to significant credit risk. The table below shows the concentrations of credit risk of the investments in bonds.

(amounts x € 1)				
	2021		2020	
Credit rating	Amount	% of NAV	Amount	% of NAV
AA	8,889,703	19.1	7,643,364	15.9
A	11,711,274	25.2	12,812,771	26.7
BBB	23,803,097	51.2	27,132,911	56.6
No rating	1,689,621	3.6	-	0.0
Total	46,093,695	99.1	47,589,046	99.2

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

VanEck iBoxx EUR Corporates UCITS ETF

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	49,349,182	111,725,186
Total costs within the Sub fund	74,036	169,727
OCF	0.15%	0.15%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	74,036	0.15%	0.15%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

A PTR of 59.6% is calculated using this formula (2020: 125.4%). This means that in 2021, purchases and sales took place in the amount of 0.6 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

General Information

Investment policy

The aim of the VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF is to follow the Markit iBoxx EUR Liquid Sovereign Diversified 1-10 Index as closely as possible.

The (general) criteria below apply to the (composition of the) Markit iBoxx EUR Liquid Sovereign Diversified 1-10 Index:

- the index consists of maximum 25 European government bonds with a maturity of 1 to 10 years, listed in euros;
- the bonds have a minimum issue of 2 billion;
- at the moment of selection and reweighting, the bonds have a minimum remaining maturity of 18 months;
- the weighting is on the basis of the outstanding amount of the bonds.
- the government bonds must pay a fixed coupon, 'plain vanilla bonds';
- the number of bonds per country is capped at 4;
- the weight per country in the Index is maximum 20%;
- the reweighting takes place on the last day of January, April, July and October. The costs incurred in connection with the reweighting of the VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF are at the expense of this Sub-fund.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 57,164 (same period in 2020: € 79,060).

VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF

7. Risks with regard to the financial instruments**Financial risk**

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The Sub-fund only has euro investments and is consequently not exposed to significant currency risk.

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by country

The Company may invest in securities of issuers located in various countries and geographic regions. The economies of individual countries may differ favorably or unfavorably from each other in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
Germany	7,521,142	20.0	7,268,714	19.8	
France	7,500,569	20.0	7,292,490	19.8	
Spain	6,667,951	17.8	6,384,991	17.4	
Italy	6,507,262	17.3	6,499,701	17.7	
Belgium	4,161,907	11.1	4,108,305	11.2	
Netherlands	4,024,041	10.7	4,101,768	11.2	
Other countries	1,068,757	2.9	925,659	2.5	
Total	37,451,629	99.7	36,581,628	99.6	

VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF

Country risk relates to uncertainty associates with investing in a certain country, which may be caused by political, economic, or technological influences. A 5% increase in the relevant country, starting on the statement of financial position date and applicable for every country, would result in a profit for the reporting period as shown in the table below.

(amounts x € 1)				
2021			2020	
Country	Amount	% of NAV	Amount	% of NAV
Germany	376,057	1.0	363,436	1.0
France	375,028	1.0	364,625	1.0
Spain	333,398	0.9	319,250	0.9
Italy	325,363	0.9	324,985	0.9
Belgium	208,095	0.6	205,415	0.6
Netherlands	201,202	0.5	205,088	0.6
Other countries	53,438	0.1	46,283	0.1

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

Interest rate risk

The Company invests in fixed-interest financial instruments and is consequently exposed to interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company is subject to interest rate risk on its debt securities and cash including margin cash held with brokers and may have an indirect exposure to interest rate risk through investments into financial derivative instruments whereby the value of the underlying asset may fluctuate as a result of a change in interest rates. Generally, the value of fixed income securities will change inversely with changes in interest rates, the effect being greater the longer the maturity of the security.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depository. Investments in equity securities are not exposed to credit risk except for exposure to the Depository.

The Company's Depository is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depository. Bankruptcy or insolvency of the Depository or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depository to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company.

Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 37,591,343 (2020: € 36,752,699).

The Sub-fund invests in monetary financial instruments and is consequently exposed to significant credit risk. The table below shows the concentrations of credit risk of the investments in bonds.

(amounts x € 1)				
	2021		2020	
Credit rating	Amount	% of NAV	Amount	% of NAV
AAA	11,545,183	30.7	11,370,483	31.0
AA	11,662,476	31.0	11,400,794	31.0
A	6,667,951	17.8	6,384,991	17.4
BBB	7,576,019	20.2	7,425,360	20.2
Total	37.451.629	99.7	36.581.628	99.6

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

8. Cost section

OCF (ongoing charges figure)

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)		2021	2020
Average intrinsic value		38,107,580	52,544,055
Total costs within the Sub fund		57,164	79,060
OCF		0.15%	0.15%

VanEck iBoxx EUR Sovereign Diversified 1-10 UCITS ETF

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	57,164	0.15%	0.15%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 123.2% is calculated using this formula (2020: 199.2%). This means that in 2021, purchases and sales took place in the amount of 1.2 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

General Information

Investment policy

The aim of the VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF is to follow the Markit iBoxx EUR Liquid Sovereigns Capped AAA-AA 1-5 Index as closely as possible.

The (general) criteria below apply to the (composition of the) Markit iBoxx EUR Liquid Sovereigns Capped AAA-AA 1-5 Index:

- the index consists of maximum 15 European government bonds with a maturity of 1.25 to 5.5 years, listed in euros;
- the bonds have a minimum issue of 2 billion;
- the bonds have a minimum rating of AA;
- at the moment of selection and reweighting, the bonds have a minimum remaining maturity of 18 months;
- the weighting is on the basis of the outstanding amount of the bonds.
- the government bonds must pay a fixed coupon, 'plain vanilla bonds';
- the number of bonds per country is capped at 3;
- the weight per country in the Index is maximum 30%;
- the reweighting takes place on the last day of February, May, August and November. The costs incurred in connection with the reweighting of the VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF are at the expense of this Sub-fund.

Total	231,512	287,951

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 252,314 (same period in 2020: € 322,662).

7. Risks with regard to the financial instruments

Financial risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The Sub-fund only has euro investments and is consequently not exposed to significant currency risk.

VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by country

The Company may invest in securities of issuers located in various countries and geographic regions. The economies of individual countries may differ favorably or unfavorably from each other in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
France	22,833,726	29.9	49,355,996	29.8	
Germany	20,041,825	26.3	45,068,406	27.2	
Netherlands	12,530,904	16.4	25,334,964	15.3	
Belgium	11,943,647	15.7	26,821,141	16.2	
Austria	8,666,260	11.4	17,989,569	10.9	
Total	76,016,362	99.6	164,570,076	99.4	

Country risk relates to uncertainty associates with investing in a certain country, which may be caused by political, economic, or technological influences. A 5% increase in the relevant country, starting on the statement of financial position date and applicable for every country, would result in a profit for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
France	1,141,686	1.5	2,467,800	1.5	
Germany	1,002,091	1.3	2,253,420	1.4	
Netherlands	626,545	0.8	1,266,748	0.8	
Belgium	597,182	0.8	1,341,057	0.8	
Austria	433,313	0.6	899,478	0.5	

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF

Interest rate risk

The Company invests in fixed-interest financial instruments and is consequently exposed to interest rate risk. Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company is subject to interest rate risk on its debt securities and cash including margin cash held with brokers and may have an indirect exposure to interest rate risk through investments into financial derivative instruments whereby the value of the underlying asset may fluctuate as a result of a change in interest rates. Generally, the value of fixed income securities will change inversely with changes in interest rates, the effect being greater the longer the maturity of the security.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depository. Investments in equity securities are not exposed to credit risk except for exposure to the Depository.

The Company's Depository is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depository. Bankruptcy or insolvency of the Depository or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depository to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depository through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company. Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 165,784,552 (2020: € 165,784,552).

The Sub-fund invests in monetary financial instruments and is consequently exposed to significant credit risk. The table below shows the concentrations of credit risk of the investments in bonds.

(amounts x € 1)	2021		2020	
Credit rating	Amount	% of NAV	Amount	% of NAV
AAA	32,572,729	42.7	70,403,370	42.5
AA	43,443,633	56.9	94,166,706	56.9
Total	76,016,362	99.6	164,570,076	99.4

Liquidity risk

VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

8. Cost section

OCF (ongoing charges figure)

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	167,957,968	214,672,648
Total costs within the Sub fund	252,314	322,662
OCF	0.15%	0.15%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	252,314	0.15%	0.15%

The percentage is calculated with respect to the average assets as used for the OCF.

VanEck iBoxx EUR Sovereign Capped AAA-AA 1-5 UCITS ETF

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 117.3% is calculated using this formula (2019: 125.4%). This means that in 2023, purchases and sales took place in the amount of 1.2 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

VanEck Sustainable World Equal Weight UCITS ETF

General Information

Investment policy

The aim of the VanEck Sustainable World Equal Weight UCITS ETF is to follow the Solactive Sustainable World Equity Index as closely as possible.

The (general) criteria below apply to the (composition of the) Solactive Sustainable World Equity Index:

- first shares are selected with a primary stock-market listing in developed countries worldwide, as described in the 'Solactive Sustainable World Equity Index Guideline';
- exclusively ordinary and preferred shares and Depositary Receipts are eligible;
- Limited Partnerships and shares listed in Hong Kong that achieve more than 75% of their turnover outside the specified developed countries are excluded;
- exclusively shares with semi-annual average trading volume of EUR 25 million per day are eligible;
- only the most liquid listing for each company is eligible;
- VigeoEIRIS tests the universe for a number of sustainability criteria, the shares that do not satisfy the criteria are removed from the universe;
- the 250 largest shares are then selected based on free float market capitalisation;
- the Index is equally weighted on the reweighting date, after that the weighting can vary due to price fluctuations;
- the Index is reweighted annually on the fourth Tuesday of March so that the 250 shares are again equally weighted. Shares can also be added or removed. If this is not a Trading Day, the reweighting takes place on the next Trading Day; and
- for each geographic region, the weighting in the Index is capped at 40% at the moment of reweighting.

Proceeds from shares issued	35,757,427	9,461,615
Transactions from merger	313,203,700	
Redemption of shares	(35,152,325)	(179,269,075)
Increase/decrease in the net assets attributable to shareholders	51,660,029	(50,388,916)
Net assets attributable to redeemable participating shareholders at the end of the financial year	475,131,021	109,662,190
Number of redeemable participating shares		
Redeemable participating shares at the beginning of the financial year	1,145,000	3,570,000
Issuance of redeemable participating shares ³	15,708,010	100,000
Repurchase of redeemable participating shares ⁴	(1,050,000)	(2,525,000)
Redeemable participating shares at the end of the financial year	15,803,010	1,145,000

3 This includes the creation of 4,035,000 shares through a stock split

4 This includes 11,123,010 shares from the merger with Series F – VanEck Global Equal Weight UCITS ETF.

VanEck Sustainable World Equal Weight UCITS ETF

4.16.5. Notes**Accounting policies**

For the accounting policies used for the financial statements, refer to the Company's accounting policies as set out in chapter 4.5.

Notes to the statement of financial position and statement of profit and loss and other comprehensive income**1. Cash and cash equivalents**

At 31 December 2021 there are no restrictions on the use of the cash and cash equivalents. When a current account shows a negative amount it is considered unsubordinated debts to credit institutions and it is reported as a bank overdraft.

The Foreign exchange rates as of 31 December 2021 are as follows:

Foreign currency	31 December 2021	Average of 2021	31 December 2020	Average of 2020
AUD	1.5641	1.5745	1.5856	1.6534

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 526,112 (same period in 2020: € 463,290).

VanEck Sustainable World Equal Weight UCITS ETF

7. Risks with regard to the financial instruments

Financial risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fund has investments denominated in foreign currency and is therefore exposed to significant currency risk.

(amounts x € 1)				
2021			2020	
Currency	Amount	% of NAV	Amount	% of NAV
US dollar	190,039,617	40.0	42,159,824	38.5

Singapore Dollar	358,366	0.1	56,569	0.1	
Norwegian Krone	113,293	0.0	23,505	0.0	

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Non-cyclical consumer goods	124,120,037	26.1	26,559,139	24.1

Cyclical consumer goods	2,316,053	0.5	617,282	0.6	
Other sectors	845,887	0.2	267,900	0.2	

A 5% decrease in the sector would have an impact of the same magnitude in the opposite direction.

Portfolio distribution by country

The Company may invest in securities of issuers located in various countries and geographic regions. The economies of individual countries may differ favorably or unfavorably from each other in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position.

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
United states of America	192,376,485	40.5	42,133,563	38.4	
Japan	69,176,810	14.6	19,174,207	17.5

Other countries	7,025,016	1.5	1,460,853	1.3	

VanEck Sustainable World Equal Weight UCITS ETF

Interest rate risk

The Sub-fund does not invest in fixed-interest financial instruments and is consequently not exposed to significant interest rate risk.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company. Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 1,410,258 (2020: € 454,758).

The Sub-fund does not invest in monetary financial instruments and is consequently not exposed to significant credit risk.

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

VanEck Sustainable World Equal Weight UCITS ETF

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	210,691,704	154,557,591
Total costs within the Sub fund	526,112	463,290
OCF	0.25%	0.30%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	526,112	0.25%	0.30%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

A PTR of 32.6% is calculated using this formula (2020: 48.0%). This means that in 2021, purchases and sales took place in the amount of 0.3 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

VanEck European Equal Weight UCITS ETF

General Information

Investment policy

The aim of the VanEck European Equal Weight UCITS ETF is to follow the Solactive European Equity Index as closely as possible.

The (general) criteria below apply to the (composition of the) Solactive European Equity Index:

- first shares are selected with a primary stock-market listing in developed European countries, as described in the 'Solactive European Equity Index Guideline';
- exclusively ordinary and preferred shares and Depositary Receipts are eligible;
- Limited Partnerships are excluded;
- exclusively shares with semi-annual average trading volume of EUR 10 million per day are eligible;
- only the most liquid listing for each company is eligible;
- the 100 biggest shares are then selected based on free float market capitalisation;
- the index is equally weighted on the reweighting date, after that the weighting can vary due to price fluctuations;
- the index is reweighted annually on the third Tuesday of March so that the 100 shares are again equally weighted. Shares can also be added or removed. If this is not a Trading Day, the reweighting takes place on the next Trading Day; and
- for each country, the weighting in the index is capped at 20% at the moment of reweighting.

Issuance of redeemable participating shares	100,000	-
Repurchase of redeemable participating shares	(175,000)	-
Redeemable participating shares at the end of the financial year	655,000	730,000

VanEck European Equal Weight UCITS ETF

4.17.5. Notes**Accounting policies**

For the accounting policies used for the financial statements, refer to the Company's accounting policies as set out in chapter 4.5.

Notes to the statement of financial position and statement of profit and loss and other comprehensive income**1. Cash and cash equivalents**

At 31 December 2021 there are no restrictions on the use of the cash and cash equivalents. When a current account shows a negative amount it is considered unsubordinated debts to credit institutions and it is reported as a bank overdraft.

The Foreign exchange rates as of 31 December 2021 are as follows:

Foreign currency	31 December 2021	Average of 2021	31 December 2020	Average of 2020
CHF	1.0361	1.0813	1.0816	1.0702
DKK	7.4375	7.4370	7.4435	7.4542
GBP	0.8396	0.8597	0.8951	0.8889
NOK	10.0281	10.1663	10.4760	10.7101
SEK	10.2960	10.1471	10.0485	10.4809
USD	1.1372	1.1829	1.2236	1.1400

2. Investments**Summary of changes in the investments according to characteristic of financial instrument**

(amounts x € 1)	2021	2020
Equity instruments		
Opening balance	40,623,256	43,018,688

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 83,259 (same period in 2020: € 75,698).

VanEck European Equal Weight UCITS ETF

7. Risks with regard to the financial instruments

Financial risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fund has investments denominated in foreign currency and is therefore exposed to significant currency risk.

(amounts x € 1)				
2021			2020	
Currency	Amount	% of NAV	Amount	% of NAV
Euro	27,722,330	61.0	24,449,362	60.1
Pound sterling	7,487,675	16.4	7,227,277	17.7
Swiss Franc	5,568,598	12.2	5,355,478	13.2
Swedish Krona	2,657,862	5.8	2,286,378	5.6
Danish Krone	1,539,506	3.4	933,144	2.3
Norwegian Krone	552,934	1.2	471,235	1.2
US dollar	20,444	0.0	39	0.0
Total	45,549,349	100.0	40,722,913	100.0

A 5% increase in the relevant currency, starting on the statement of financial position date and applicable for every currency, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)				
2021			2020	
Currency	Amount	% of NAV	Amount	% of NAV
Pound sterling	374,384	0.8	361,364	0.9
Swiss Franc	278,430	0.6	267,774	0.7
Swedish Krona	132,893	0.3	114,319	0.3
Danish Krone	76,975	0.2	46,657	0.1
Norwegian Krone	27,647	0.1	23,562	0.1
US dollar	1,022	0.0	2	0.0

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

VanEck European Equal Weight UCITS ETF

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Non-cyclical consumer goods	11,871,845	26.1	9,178,728	22.5

A 5% decrease in the sector would have an impact of the same magnitude in the opposite direction.

VanEck European Equal Weight UCITS ETF

Portfolio distribution by country

The Company may invest in securities of issuers located in various countries and geographic regions. The economies of individual countries may differ favourably or unfavourably from each other in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
France	8,498,432	18.7	7,962,225	19.6	
Germany	7,244,630	15.9	8,174,483	20.2	
United Kingdom	6,690,338	14.7	7,222,329	17.7	
Switzerland	5,566,382	12.2	5,350,692	13.1	
Netherlands	3,987,050	8.8	3,340,973	8.2	
Spain	2,396,354	5.3	2,196,192	5.4	
Sweden	2,139,800	4.7	2,286,321	5.6	
Other countries	8,911,710	19.5	4,090,041	10.0	
Total	45,434,696	99.7	40,623,256	99.8	

Country risk relates to uncertainty associates with investing in a certain country, which may be caused by political, economic, or technological influences. A 5% increase in the relevant country, starting on the statement of financial position date and applicable for every country, would result in a profit for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
France	424,922	0.9	398,111	1.0	
Germany	362,232	0.8	408,724	1.0

Switzerland	278,319	0.6	267,535	0.7	
Netherlands	199,353	0.4	167,049	0.4	
Spain	119,818	0.3	109,810	0.3	
Sweden	106,990	0.2	114,316	0.3	
Other countries	445,586	1.0	204,502	0.5	

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

Interest rate risk

The Sub-fund does not invest in fixed-interest financial instruments and is consequently not exposed to significant interest rate risk.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

VanEck European Equal Weight UCITS ETF

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company. Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 179,053 (2020: € 199,913).

The Sub-fund does not invest in monetary financial instruments and is consequently not exposed to significant credit risk.

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

VanEck European Equal Weight UCITS ETF

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	41,641,546	37,867,191
Total costs within the Sub fund	83,259	75,698
OCF	0.20%	0.20%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	53,679	0.28%	0.20%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 37.8% is calculated using this formula (2020: 27.0%). This means that in 2021, purchases and sales took place in the amount of 0.4 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

VanEck Morningstar North America Equal Weight UCITS ETF

General Information

Investment policy

The aim of the VanEck Morningstar North America Equal Weight UCITS ETF is to follow the Morningstar® North America Equal Weight 100 Index as closely as possible.

The (general) criteria below apply to the (composition of the) Morningstar North America Equal Weight 100 Index:

- the universe is determined based on the Morningstar® Developed Americas Index;
- the 100 largest shares are selected from this based on free float market capitalisation;
- the index is equally weighted on the reweighting date, after that the weighting can vary due to price fluctuations;
- the index is reweighted annually on the third Friday of June so that the 100 shares are again equally weighted.

Shares can also be added or removed. If this is not a Trading Day, the reweighting takes place on the next Trading Day; and

- the 100 largest shares are determined on the last trading day in May.

4.18.5. Notes**Accounting policies**

For the accounting policies used for the financial statements, refer to the Company's accounting policies as set out in chapter 4.5.

Notes to the statement of financial position and statement of profit and loss and other comprehensive income**1. Cash and cash equivalents**

At 31 December 2021 there are no restrictions on the use of the cash and cash equivalents. When a current account shows a negative amount it is considered unsubordinated debts to credit institutions and it is reported as a bank overdraft.

The Foreign exchange rates as of 31 December 2021 are as follows:

Foreign currency	31 December 2021	Average of 2021	31 December 2020	Average of 2020
CAD	1.4365	1.4829	1.5588	1.5290
USD	1.1372	1.1829	1.2236	1.1400

2. Investments**Summary of changes in the investments according to characteristic of financial instrument**

(amounts x € 1)	2021	2020
Equity instruments		
Opening balance	8,099,410	6,266,585
Purchases of investments	1,818,776	5,743,249
Sales of investments	(3,066,628)	(4,106,751)
Changes in value	2,659,065	196,327
closing balance equity instruments	9,510,623	8,099,410

The table below provides an analysis of the financial instruments measured at fair value, per valuation method.

Composition of investments according to valuation technique

(amounts x € 1)	2021	2020
Level 1	9,510,623	8,099,410
Total	9,510,623	8,099,410

All the investments of the Sub-fund are listed and therefore classified as level 1 investments.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 18,551 (same period in 2020: € 18,017).

VanEck Morningstar North America Equal Weight UCITS ETF

7. Risks with regard to the financial instruments**Financial risk**

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fund has investments denominated in foreign currency and is therefore exposed to significant currency risk.

(amounts x € 1)		2021		2020	
Currency	Amount	% of NAV	Amount	% of NAV	
US dollar	9,249,264	97.1	9,903,075	122.2	
Canadian dollar	276,277	2.9	420,531	5.2	
Euro	(3,929)	0.0	(2,221,951)	(27.4)	
Total	9,521,612	100.0	8,101,655	100.0	

A 5% increase in the relevant currency, starting on the statement of financial position date and applicable for every currency, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Currency	Amount	% of NAV	Amount	% of NAV	
US dollar	462,463	4.9	495,154	6.1	
Canadian dollar	13,814	0.1	21,027	0.3	

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

VanEck Morningstar North America Equal Weight UCITS ETF

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Non-cyclical consumer goods	2,694,544	28.3	2,277,892	28.2	
Technology	2,010,291	21.1	1,464,961	18.1

Industrial	40,187	0.4	37,044	0.5	
Other sectors	19,395	0.2	24,035	0.3	

A 5% decrease in the sector would have an impact of the same magnitude in the opposite direction.

VanEck Morningstar North America Equal Weight UCITS ETF

Portfolio distribution by country

The Company may invest in securities of issuers located in various countries and geographic regions. The economies of individual countries may differ favorably or unfavorably from each other in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position

(amounts x € 1)	2021		2020	
Country	Amount	% of NAV	Amount	% of NAV
United states of America	9,133,447	95.9	7,679,335	94.8
Canada	275,428	2.9	420,075	5.2
United Kingdom	101,748	1.1	-	0.0
Total	9,510,623	99.9	8,099,410	100.0

Country risk relates to uncertainty associates with investing in a certain country, which may be caused by political, economic, or technological influences. A 5% increase in the relevant country, starting on the statement of financial position date and applicable for every country, would result in a profit for the reporting period as shown in the table below.

(amounts x € 1)	2021		2020	
Country	Amount	% of NAV	Amount	% of NAV
United states of America	456,672	4.8	383,967	4.7
Canada	13,771	0.1	21,004	0.3
United Kingdom	5,087	0.1	-	0.0

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

Interest rate risk

The Sub-fund does not invest in fixed-interest financial instruments and is consequently not exposed to significant interest rate risk.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depository. Investments in equity securities are not exposed to credit risk except for exposure to the Depository.

The Company's Depository is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depository. Bankruptcy or insolvency of the Depository or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depository to be delayed or limited. The credit rating of State Street Corporation as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depository through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company.

Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 14,918 (2020: € 2,232,634).

The Sub-fund does not invest in monetary financial instruments and is consequently not exposed to significant credit risk.

VanEck Morningstar North America Equal Weight UCITS ETF

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

8. Cost section**OCF (ongoing charges figure)**

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	9,276,349	9,027,029
Total costs within the Sub fund	18,551	18,017
OCF	0.20%	0.20%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	18,551	0.20%	0.20%

The percentage is calculated with respect to the average assets as used for the OCF.

VanEck Morningstar North America Equal Weight UCITS ETF

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 39.2% is calculated using this formula (2020: 41.5%). This means that in 2021, purchases and sales took place in the amount of 0.4 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF

General Information

Investment policy

The aim of the VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF is to follow the Morningstar® Developed Markets Large Cap Dividend Leaders Index as closely as possible.

The (general) criteria below apply to the (composition of the) Morningstar Developed Markets Large Cap Dividend Leaders Index:

- the universe is determined based on the Morningstar® Global Markets ex-US Index and Morningstar® US Market Index;
- companies are eligible for inclusion in the index if various criteria based on (historical) Distributions are met;
- from these, the 100 shares with the highest dividend yield are selected;
- on the reweighting date, the index is weighted based on the total dividend made available. The available dividend is calculated by multiplying the freely tradable outstanding shares by the last annual dividend. After that the weighting can vary due to price fluctuations;
- the weighting in the index is capped at 40% per sector. In addition to this, the maximum weighting per share is 5%;
- the index is reweighted semi-annually on the third Friday of June and December. Shares can also be added or removed; and
- the 100 largest shares are determined on the basis of dividend yield on the last trading day in May and November.

6. Related parties

A party is an related party if one party can exercise control over the other party or exert significant influence on the other party's financial and operational policy.

VanEck Asset Management B.V. is the Company's director according to the articles of association and acts as Manager of the Company.

The management costs include all costs relating to the management of a fund, such as the management fee, costs of the custodial bank and the payment office, the listing costs, auditor's fee, costs of the purchase and issue of shares, the costs of having the Sub-funds correspond to the relevant index and the administration costs. The management costs are deducted daily from the definitive Net Intrinsic Value of a share in a Sub-fund. The management costs for the period from 1 January 2021 to 31 December 2021 amount to € 176,332 (same period in 2020: € 121,252).

7. Risks with regard to the financial instruments

Financial risk

The Company is exposed to a variety of financial risks in pursuing its stated investment objective and policy such as: currency risk, other price risk and interest rate risk. The Company takes exposure to certain of these risks to generate investment returns on its portfolio, although these risks can also potentially result in a reduction in The Company's net assets. The Investment Manager will use its best endeavours to minimise the potentially adverse effects of these risks on The Company's performance where it can do so while still managing the investments of The Company in a way that is consistent with The Company's investment objective and policy.

In terms of market risk, a distinction can be made between:

- Currency risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in exchange rates;
- Market price risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in market prices caused by factors that apply exclusively for the individual instrument or emitting party, or by factors that affect all instruments traded on the market;
- Interest rate risk, which is the risk that the value of a financial instrument will fluctuate as the result of changes in the market interest rate.

The notion of market risk encompasses not only the likelihood of losses, but also the likelihood of gains.

Currency risk

Currency risk is defined as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Each Sub-Fund is exposed to currency risk as monetary assets and liabilities of the Sub-Funds which may be denominated in a currency other than the functional currency of the Sub-Funds. Currency risk on non-monetary assets i.e. equities, is included in market price risk.

The fund has investments denominated in foreign currency and is therefore exposed to significant currency risk.

(amounts x € 1)	2021		2020	
Currency	Amount	% of NAV	Amount	% of NAV
US dollar	22,526,652	38.5	11,817,203	33.3

Total	58,577,569	100.0	35,470,815	100.0

VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF

A 5% increase in the relevant currency, starting on the statement of financial position date and applicable for every currency, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Currency	Amount	% of NAV	Amount	% of NAV	
US dollar	1,126,333	1.9	590,860	1.7	
Japanese Yen	343,910	0.6	219,895	0.6	
Pound sterling	284,071	0.5	231,077	0.7	
Canadian dollar	264,469	0.5	205,438	0.6	
Swiss Franc	200,491	0.3	126,762	0.4	
Hong Kong dollar	42,430	0.1	37,619	0.1	
Australian dollar	32,143	0.1	209	0.0	
Norwegian Krone	15,805	0.0	4,727	0.0	
Singapore Dollar	14,678	0.0	41,447	0.1	
Polish Zloty	3,090	0.0	-	0.0	
Israeli Shekel	3,067	0.0	-	0.0	
Swedish Krona	271	0.0	1,974	0.0	
Danish Krone	25	0.0	144	0.0	

A 5% decrease in a currency would have an impact of the same magnitude in the opposite direction.

Market price risk

Market price risk is defined as risk that the fair value of a financial instrument or its future cash flows will fluctuate because of changes in market prices. The risk as a result of changes in market prices is limited by diversifying the investments in the portfolio as much as possible by region and sector.

Portfolio distribution by sector

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Financial	15,695,251	26.8	12,783,018	36.0	
Non-cyclical consumer goods	14,753,415	25.2	8,309,811	23.4	
Energy	8,055,274	13.7	-	0.0	
Communications	7,156,800	12.2	4,205,405	11.9	
Basic Materials	4,220,594	7.2	2,892,639	8.2	
Utilities	3,832,149	6.5	2,354,971	6.6	
Technology	1,628,673	2.8	2,108,856	5.9	
Other sectors	3,087,335	5.3	2,685,419	7.6	
Total	58,429,491	99.7	35,340,119	99.6	

VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF

A 5% increase in the relevant sector, starting on the statement of financial position date and applicable for every sector, would result in a profit increase for the reporting period as shown in the table below.

(amounts x € 1)		2021		2020	
Sector	Amount	% of NAV	Amount	% of NAV	
Financial	784,763	1.3	639,151	1.8	
Non-cyclical consumer goods	737,671	1.3	415,491	1.2	
Energy	402,764	0.7	-	0.0	
Communications	357,840	0.6	210,270	0.6	
Basic Materials	211,030	0.4	144,632	0.4

Technology	81,434	0.1	105,443	0.3	
Other sectors	154,367	0.3	134,271	0.4	

A 5% decrease in the sector would have an impact of the same magnitude in the opposite direction.

Portfolio distribution by country

The Company may invest in securities of issuers located in various countries and geographic regions. The economies of individual countries may differ favorably or unfavorably from each other in such respects as growth of gross domestic product or gross national product, rate of inflation, capital reinvestment, resource self-sufficiency and balance of payments position

(amounts x € 1)		2021		2020	
Country	Amount	% of NAV	Amount	% of NAV	
United states of America	22,947,822	39.2	11,720,981	33.0	
Japan	6,864,073	11.7	4,396,654	12.4

VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF

Country risk relates to uncertainty associates with investing in a certain country, which may be caused by political, economic, or technological influences. A 5% increase in the relevant country, starting on the statement of financial position date and applicable for every country, would result in a profit for the reporting period as shown in the table below.

(amounts x € 1)				
2021			2020	
Country	Amount	% of NAV	Amount	% of NAV
United states of America	1,147,391	2.0	586,049	1.7
Japan	343,204	0.6	219,833	0.6
France	307,296	0.5	155,598	0.4
Canada	263,075	0.4	204,953	0.6
United Kingdom	188,413	0.3	191,661	0.5
Switzerland	176,187	0.3	126,584	0.4
Other countries	495,908	0.8	282,328	0.8

A 5% decrease in the relevant country would have an impact of the same magnitude in the opposite direction.

Interest rate risk

The Sub-fund does not invest in fixed-interest financial instruments and is consequently not exposed to significant interest rate risk.

Credit risk

Credit risk is the risk that an issuer or counterparty may be unable to meet a commitment that it has entered into with the Company, which means the company will have to recognise a financial loss. The Sub-Funds have exposure to counterparty risk on debt securities, forward foreign currency exchange contracts and cash balances held with the Depositary. Investments in equity securities are not exposed to credit risk except for exposure to the Depositary.

The Company's Depositary is State Street Bank International GmbH Amsterdam Branch. All of the assets and cash of the Sub-Funds are held within the custodial network of the Depositary. Bankruptcy or insolvency of the Depositary or of its parent company, State Street Corporation, may cause the Sub-Funds' rights with respect to its investments in debt, equity securities and cash held by the Depositary to be delayed or limited. The credit rating of **State Street Corporation** as at 31 December 2021 is AA- (31 December 2020: AA-) (per Standard&Poor's ('S&P') rating).

All securities, cash at bank balances and bank overdrafts and cash or non-cash collateral received by the Sub-Funds are held by the Depositary through its affiliates in the State Street group, or through a subcustody within the State Street custodial network. Cash deposited as margin or other similar investments/monies deposited by or entered into on behalf of the UCITS with a counterparty, options exchange, clearing broker or other parties are not held within the State Street custodial network. All derivatives held at the financial year end were held with State Street Bank and Trust Company.

Credit risk is the risk that the contract party in a financial instrument will not satisfy its obligation, which means the Sub-fund will have to recognise a financial loss. The amount that best represents the maximum credit risk is € 1,841,392 (2020: € 173,991).

The Sub-fund does not invest in monetary financial instruments and is consequently not exposed to significant credit risk.

Liquidity risk

Liquidity risk, also called funding risk, is the risk that the legal entity will be unable to secure the financial resources needed to satisfy obligations under the financial instruments. Liquidity risk can arise, for instance, if a financial asset cannot be sold at fair value in the short term.

The Company has a low risk appetite for liquidity risk. The Company invests mainly in securities with high level of liquidity. At year end, 100 % of the portfolio could be sold within 3 business days.

VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF

Shares in the fund can be bought and sold on Euronext Amsterdam, whereby the Liquidity Provider ensures that there is both a bid and ask price at which the share can be traded. The fund's investments are likewise listed. Consequently the Sub-fund is not exposed to significant liquidity risk.

8. Cost section

OCF (ongoing charges figure)

The OCF is a measure of the ongoing costs charged to the Sub-fund during the reporting period. The following starting points are important for calculating the ongoing charges:

- The OCF shows the ratio of ongoing costs to average intrinsic value. The ongoing charges encompass all costs charged to the fund assets during the reporting period, with the exception of the spread applied for the entry and exit of shareholders, any performance fees and transaction costs of investments and interest charges on bank accounts. Performance fees must be presented separately, if applicable. No performance fee applies for the VanEck UCITS ETFs.
- The average intrinsic value is based on the intrinsic values on every day that the intrinsic value of the Sub-fund is determined during the reporting period.

(amounts x € 1)	2021	2020
Average intrinsic value	46,436,326	31,920,997
Total costs within the Sub fund	176,332	121,252
OCF	0.38%	0.38%

Comparison of costs to prospectus over 2021 financial year

(amounts x € 1)	Amount	%	Prospectus
Total costs within the Sub fund	176,332	0.38%	0.38%

The percentage is calculated with respect to the average assets as used for the OCF.

Portfolio Turnover ratio

The Portfolio Turnover ratio (PTR) gives an indication of the turnover rate of the Sub-fund's portfolio. This indicator gives an impression of the relative transaction costs involved in the differences in portfolio management.

The PTR is calculated as follows:

$$[(\text{Total 1} - \text{Total 2}) / X] * 100$$

Total 1: the total amount in securities transactions (securities purchases + securities sales)

Total 2: the total amount in transactions (issue + purchases) of participation rights in the investment institution

X: the average intrinsic value of the investment institution.

An PTR of 115.5% is calculated using this formula (2020: 152.2%). This means that in 2021, purchases and sales took place in the amount of 1.2 times the average intrinsic value of the Sub-fund. This amount has been corrected for the regular purchases and sales performed on account of entries and exits.

5. Other information

Interests of the members of the Board of Directors

The members of the Board of Directors hold positions in the UCITS ETFs of VanEck and in the investments of these UCITS ETFs. The transactions by the members of the Board of Directors in VanEck are reported to the Compliance Officer in accordance with the rules for Private Investing Transactions.

Interests of the members of the Board of Directors	2021	2020

Serie N – VanEck Morningstar Developed Markets Dividend Leaders UCITS ETF	47,388	34,931

Altogether, the members of VanEck's Board of Directors have invested approximately 4,6 million in the UCITS ETFs (2020: 4,4 million euros).

Provisions in the articles of association concerning the appropriation of the result

According to article 22 of the articles of association, the company may only make distributions to the shareholders (and any other entitled parties) to the profit available for distribution insofar as the equity of the company exceeds the amount of the paid-up capital of the company plus the reserves that must be maintained pursuant to the law. Distribution of profits takes place after the adoption of the financial statements showing that such distribution is permissible.

From the profit shown by the adopted financial statements, first a dividend is paid out on the priority shares in the amount of four percent (4%) on the nominal amount paid-up on these shares.

Special rights under the articles of association

These are the rights of the holders of priority shares in relation to the pre-emptive right upon the issue of priority shares, the first right to profit distribution as well as the convening of a meeting of holders of priority shares.

26 April 2022,

The Board of Directors,

G. Koning

M. Rozemuller

Independent auditor's report

To: the shareholders of VanEck ETFs N.V.

Report on the audit of the financial statements 2021 included in the annual report

Our opinion

We have audited the financial statements for the year ended on 31 December 2021 of VanEck ETFs N.V., based in Amsterdam, The Netherlands.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of VanEck ETFs N.V. as at 31 December 2021 and of its result and its cash flows for 2021 in accordance with International Financial Reporting Standards as adopted by the European Union (EU-IFRS) and with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

- ▶ The statement of financial position as at 31 December 2021
- ▶ The following statements for 2021: the statements of profit and loss and other comprehensive income, cash flows and changes in net assets attributable to shareholders
- ▶ The notes comprising of a summary of the significant accounting policies and other explanatory information, including the financial information of the sub-funds

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the "Our responsibilities for the audit of the financial statements section of our report".

We are independent of VanEck ETFs N.V. (hereinafter: the investment entity) in accordance with the EU Regulation on specific requirements regarding statutory audit of public-interest entities, the "Wet toezicht accountantsorganisaties" (Wta, Audit firms supervision act), the "Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten" (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore we have complied with the "Verordening gedrags- en beroepsregels accountants" (VGBA, Dutch Code of Ethics).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information in support of our opinion

We designed our audit procedures in the context of our audit of the financial statements as a whole and in forming our opinion thereon. The following information in support of our opinion and any findings were addressed in this context, and we do not provide a separate opinion or conclusion on these matters.

Our understanding of VanEck ETFs N.V.

VanEck ETFs N.V. is an investment entity with variable capital, having its registered office in Amsterdam, The Netherlands, and consists out of 13 sub-funds as at 31 December 2021 (undertakings for collective investment in transferable securities, UCITS). The sub-funds are traded via Euronext Amsterdam, segment Euronext Fund Service. The sub-funds invest in listed securities for which the fair value is derived from quoted market prices. On 8 October 2021 the sub-fund VanEck Global Equal Weight UCITS ETF has been merged into sub-fund VanEck Sustainable World Equal Weight UCITS ETF.

The management company and management board of VanEck ETFs N.V. and its sub-funds is VanEck Asset Management B.V., of which VanEck Associated Corporation holds a controlling interest. References to positions and departments in this section are positions and departments of VanEck Asset Management B.V.

We start by determining materiality and identifying and assessing the risks of material misstatement of the financial statements, whether due to fraud or error in order to design audit procedures responsive to those risks and to obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Materiality

Materiality	Materiality is determined at sub-fund level of VanEck ETFs N.V.
Benchmark	0,5% of net assets attributable to shareholders per sub-fund.
Explanation	We consider the net assets attributable to shareholders per sub-fund to be an appropriate base for the determination of the materiality as net assets attributable to shareholders of an investment entity is generally viewed as a measure of importance to the primary users of financial statements of the investment entity, and due to the fact that the net asset attributable to shareholders per share best reflect investor's interest in the investment entity. The determination of materiality has not changed compared to the previous year.

We have also taken into account misstatements and/or possible misstatements that in our opinion are material for the users of the financial statements for qualitative reasons.

We agreed with the board of directors that misstatements in excess of 5% of the materiality per sub-fund, which are identified during the audit, would be reported to them, as well as smaller misstatements that in our view must be reported on qualitative grounds.

Teaming and use of specialists

We ensured that the audit teams included the appropriate skills and competences which are needed for the audit of a listed investment entity. We included specialists in the area of taxes.

Our focus on fraud and non-compliance with laws and regulations

Our responsibility

Although we are not responsible for preventing fraud or non-compliance and we cannot be expected to detect non-compliance with all laws and regulations, it is our responsibility to obtain reasonable assurance that the financial statements, taken as a whole, are free from material misstatement, whether caused by fraud or error.

Our audit response related to fraud risks

We identify and assess the risks of material misstatements of the financial statements due to fraud. During our audit we obtained an understanding of the investment entity and its environment and the components of the system of internal control, including the risk assessment process and the board of director's process for responding to the risks of fraud and monitoring the system of internal control, as well as the outcomes. References are made to section 3. Report from the board of directors of the annual report of VanEck ETFs N.V. for the board of director's (fraud) risk assessment.

We evaluated the design and relevant aspects of the system of internal control and in particular the fraud risk assessment, as well as the code of ethics and business conduct and the incident registration.

We evaluated the design and implementation, and where considered appropriate, tested the operating effectiveness of internal controls designed to mitigate fraud risks.

As part of our process of identifying fraud risks, we evaluated fraud risk factors with respect to financial reporting fraud, misappropriation of assets and bribery and corruption, including potential conflict of interest between the management company and the investors in the investment entity. We evaluated whether these factors indicate that a risk of material misstatement due fraud is present.

We incorporated elements of unpredictability in our audit. We also considered the outcome of our other audit procedures and evaluated whether any findings were indicative of fraud or non-compliance.

As in all of our audits, we addressed the risks related to management override of controls. Because of this risk, we have performed testing on journal entries with an increased risk and reviewed accounting estimates for biases that may present a risk of material misstatement, focusing in particular on important areas that require significant judgement as disclosed in section "Use of assumptions and estimates" in the notes to the financial statements. We also examined transactions where the costs of the investment entity are revenues for the management company and/or related parties. In that context, we refer to the key audit matter "Outsourcing".

We considered available information and made enquiries of relevant executives, directors, and the external compliance officer.

From our evaluation of the risk of override of controls by management, enquiries and other available information did not lead to specific indications for fraud or suspected fraud potentially materially impacting the view of the financial statements.

Our audit response related to risks of non-compliance with laws and regulations

We assessed factors related to the risks of non-compliance with laws and regulations that could reasonably be expected to have a material effect on the financial statements. In line with NBA Practice Note 1142 from the professional body for auditors in the Netherlands (NBA) on the “Specific obligations from laws and regulations on financial supervision for the internal auditor and the external auditor of investment firms, alternative investment funds (managers) and (management companies of) undertakings for collective investment in transferable securities”, is our estimate based on our general industry experience, through discussions with the board of directors, inspection of the integrity risk analysis (SIRA), reading minutes, and compliance reports, and performing substantive tests of details of classes of transactions, account balances or disclosures.

We also inspected correspondence with regulatory authorities and remained alert to any indication of (suspected) non-compliance throughout the audit. Finally we obtained written representations that all known instances of non-compliance with laws and regulations have been disclosed to us.

Our audit response related to going concern

As disclosed in the notes to the financial statements, the board of directors made a specific assessment of the investment entity’s ability to continue as a going concern and continue its operations for at least the next twelve months.

We discussed and evaluated the specific assessment with the board of directors exercising professional judgement and maintaining professional scepticism. We considered whether the board of directors’ going concern assessment, based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, contains all events or conditions that may cast significant doubt on the investment entity’s ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor’s report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion.

Based on our procedures performed, we did not identify serious doubts on the investment entity’s ability to continue as a going concern for the next twelve months. Our conclusions are based on the audit evidence obtained up to the date of our auditor’s report. However, future events or conditions may cause an investment entity to cease to continue as a going concern.

Our key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements. We have communicated the key audit matters to the board of directors. The key audit matters are not a comprehensive reflection of all matters discussed.

We have examined the merger on 8 October 2021 of the sub-fund VanEck Global Equal Weight UCITS ETF with the sub-fund VanEck Sustainable World Equal Weight UCITS ETF and reported on the actual exchange ratio in our assurance report pursuant to Section 4:62f of the Wet op het financieel toezicht (Wft, Act on Financial Supervision) dated 11 October 2021. The assurance procedures as of 8 October 2021 were in line those described in the key audit matters below. Therefore, we have made no changes to our key audit matters compared to the previous year.

Existence, ownership and valuation of investments

Risk	<p>The net assets attributable to shareholders of the investment entity are invested primarily in listed shares and bonds. These investments are a significant factor in the financial position of the investment entity. We refer to Note 2. Investments for the investment entity and Note 2. Investments of the financial statements of each of the sub-funds for the composition of investments according to valuation technique.</p> <p>We do not consider these investments to be at a higher risk of significant misstatement, or to be subject to a significant degree of judgment, because the investments consist of financial instruments admitted to listing on a regulated market and therefore classified as Level 1 investments. However, due to the materiality in the context of the financial statements as a whole, the investments are the item that had the largest impact on our audit.</p>
Our audit approach	<p>Our audit procedures included among others the evaluation of the accounting policy applied by the investment entity for the recognition and measurement of investments and whether the (currency) pricing data and protocols are in accordance with EU-IFRS and Part 9 of Book 2 of the Dutch Civil Code and whether these accounting policies, data and protocols have been consistently applied. Also, we have evaluated the design and implementation of controls related to the valuation process of the investments.</p> <p>Our audit procedures regarding the existence, ownership and valuation of the investments consisted amongst others of:</p> <ul style="list-style-type: none"> ▶ Reconciliation of the values of the investments in the sub-fund portfolios with the independent pricing obtained from at least one independent pricing source ▶ Verification of the existence and ownership of the investments with the independently received confirmation from the custodian
Key observations	<p>The execution of these procedures did not yield significant findings with regard to the existence, ownership or valuation of the listed investments.</p>

Investment results

Risk	<ul style="list-style-type: none"> ▶ The investment result is the main source of income of the investment entity and is therefore considered a key audit matter. Investment result comprises inter alia dividend income, interest income and changes in the value of investments. <p>We refer to “the tracking differences and tracking errors of the VanEck UCITS ETFs” in the Report from the board of directors and the breakdown of the income in the statement of profit and loss and other comprehensive income and the related disclosures for the investment entity and for each of the sub-funds.</p>
Our audit approach	<p>Our audit procedures with regard to the completeness, occurrence and measurement of the income from equity instruments and bonds held by the sub-funds consisted amongst others of:</p> <ul style="list-style-type: none"> ▶ Understanding and evaluating the internal control, including relevant IT-systems and controls in place around transaction processing, corporate actions, reconciliation of investments and portfolio valuation.

Investment results

	<p>We obtained and evaluated independent reports on the design, implementation and operational effectiveness of relevant controls;</p> <ul style="list-style-type: none"> ▶ Performing detailed analytical procedures per sub-fund (data analytics) on all types of income from investments based on market data in relation to the investments and in relation to the index tracked by each of the sub-funds.
Key Observations	<p>The execution of our audit procedures did not yield significant findings related to income from investments.</p>

Outsourcing

Risk	<p>The investment entity does not have employees and has outsourced the management of its assets, risk management, shareholders registration, fund accounting, as well as the bookkeeping to the management company (VanEck Asset Management B.V.). Also, the management company has outsourced a part of these activities to the administrator: State Street Bank International GmbH, Amsterdam branch.</p> <p>We consider outsourcing to be a key audit matter, as the financial information from these activities is used for the preparation of the financial statements of the investment entity and the board of directors is ultimately responsible for the full service chain including the controlled and sound business processes of the management company. This mainly comprises the following two aspects:</p> <ul style="list-style-type: none"> ▶ Controlling the business processes and operational risk management by the management company and the investment entity's administrator ▶ Mitigating integrity risks, which may result from a potential conflict of interest between the management company and the investors in the sub-funds <p>References are made to the disclosures on the outsourced activities as stated in section "Outsourcing of tasks" in the notes to the financial statements and the report from the board of directors Section 3 under "Risk management", including the in-control statement of the management company.</p>
Our audit approach	<p>As part of our audit of the financial statements of the investment entity, we have focused on the controlled and sound business processes of the management company in accordance with NBA Practice Note 1142. Thereby, our audit procedures consisted among others of, but were not limited to, the following:</p> <ul style="list-style-type: none"> ▶ Obtaining an understanding of the design and testing of controls of the management company and other parties to which (key) processes have been outsourced, including relevant IT General Controls. We made use of the independent SOC1 reports from the administrator to whom processes are outsourced to conclude upon the design, implementation and operating effectiveness of relevant controls of the administrator ▶ Confirming that the management company and depositary hold the required license from the supervisory authority

Outsourcing	
	<ul style="list-style-type: none"> ▶ Reading the correspondence with the supervisory authorities and the report from the independent depositary. In performing our audit procedures, we have remained alert of signals of potential non-compliance with laws and regulations in general and more specifically, the provisions of the Wet op het financieel toezicht (Wft, Act on Financial Supervision) and the Wet ter voorkoming van witwassen en financiering terrorisme (Wwft, Act on the prevention of money laundering and terrorist financing) ▶ Recalculation of the management fees charged by the management company to the sub-funds of the investment entity with the stipulations as defined in the prospectus ▶ Verification that related party transactions are accurately and completely disclosed ▶ Performing substantive audit procedures, such as analytical reviews and sampling, on the outcome of relevant flows of financial information
Key Observations	The execution of our audit procedures, did not yield significant findings relating to outsourced activities and the outcome of relevant flows of financial information with a direct impact on the financial statements.

Report on other information included in the annual report

The annual report contains other information in addition to the financial statements and our auditor's report thereon.

Based on the following procedures performed, we conclude that the other information:

- ▶ Is consistent with the financial statements and does not contain material misstatements
- ▶ Contains the information as required by Part 9 of Book 2 of the Dutch Civil Code for the management report and the other information as required by Part 9 of Book 2 of the Dutch Civil Code

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements. By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil code and the Dutch Standard 720. The scope of the procedures performed is substantially less than the scope of those performed in our audit of the financial statements.

The board of directors is responsible for the preparation of the other information, including the management report in accordance with Part 9 of Book 2 of the Dutch Civil Code and other information required by Part 9 of Book 2 of the Dutch Civil Code.

Report on other legal and regulatory requirements

Engagement

We were appointed by the general meeting as auditor for VanEck ETFs N.V. for the audit of 2020 and have operated as statutory auditor ever since that date.

No prohibited non-audit services

We have not provided prohibited non-audit services as referred to in Article 5(1) of the EU Regulation on specific requirements regarding statutory audit of public-interest entities.

Description of responsibilities regarding the financial statements

Responsibilities of the board of directors for the financial statements

The board of directors of VanEck Asset Management B.V., the sole managing director and the management company of the investment entity (hereafter: the board of directors), is responsible for the preparation and fair presentation of the financial statements in accordance with Part 9 of Book 2 of the Dutch Civil Code. Furthermore, the board of directors is responsible for such internal control as the board of directors determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, the board of directors is responsible for assessing the investment entity's ability to continue as a going concern. Based on the financial reporting frameworks mentioned, the board of directors should prepare the financial statements using the going concern basis of accounting unless the board of directors either intends to liquidate the investment entity or to cease operations, or has no realistic alternative but to do so. The board of directors should disclose events and circumstances that may cast significant doubt on the investment entity's ability to continue as a going concern in the financial statements.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit engagement in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not detect all material errors and fraud during our audit.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgment and have maintained professional scepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. The 'Information in support of our opinion' section above includes an informative summary of our responsibilities and the work performed as the basis for our opinion.

Our audit further included among others:

- ▶ Performing audit procedures responsive to the risks identified, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion
- ▶ obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the investment entity's internal control
- ▶ evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board of directors
- ▶ evaluating the overall presentation, structure and content of the financial statements, including the disclosures
- ▶ evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation

Communication

We communicate with the board of directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit. In this respect we also submit an additional report to the board of directors in accordance with Article 11 of the EU Regulation on specific requirements regarding statutory audit of public-interest entities. The information included in this additional report is consistent with our audit opinion in this auditor's report.

We provide the board of directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the board of directors, we determine the key audit matters: those matters that were of most significance in the audit of the financial statements. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, not communicating the matter is in the public interest.
