

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

VanEck Hydrogen Economy UCITS ETF (the "Fund")

a sub-fund of VanEck UCITS ETFs plc (the "Company")
Share Class: USD A ISIN: IE00BMDH1538

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The Fund's investment objective is to replicate, before fees and expenses, the price and yield performance of the MVIS Global Hydrogen Economy ESG Index (the "Index").

In order to seek to achieve its investment objective, the Manager will normally use a replication strategy by investing directly in the underlying equity securities of the Index being the stock, American depository receipts (ADRs), and global depository receipts (GDRs). Such equity securities must be issued by companies who generate at least 50% of their revenues from the global hydrogen segment, fuel cell companies or industrial gases companies listed or traded on the Markets referred to in Appendix II of the Prospectus. For the avoidance of doubt, where the Index already holds such equity securities, the Index will seek to remove the security when the percentage of revenue generated from the global hydrogen segment, fuel cell companies or industrial gases drops below 25% of the relevant companies revenues.

The Manager has categorised the Fund as meeting the provisions set out in Article 9(1) of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector ("SFDR") for products, which have sustainable investment as their objective and where an index has been designated as a reference benchmark.

The Index Provider will utilize ESG data provided by ISS. Companies with very severe social norms violations, have greater than 0% revenue exposure to controversial weapons, or that exceed certain thresholds of revenue exposure to various sectors including but not limited to civilian firearms, tobacco, and energy extractives are not eligible for inclusion. Further, companies that are not covered by ISS or for which relevant data fields are not collected by ISS may be eligible for inclusion.

Where it is not practical or cost efficient for the Fund to fully replicate the Index, the Manager may utilise an optimised sampling methodology.

Where it is not practical or cost efficient for the Fund to fully replicate the Index, the Fund will not avail of the increased limits as set out in Regulation 71 of the

CBI UCITS Regulations. The Fund may invest up to 15% of its Net Asset Value directly in shares issued by companies listed on the Shanghai Stock Exchange or the Shenzhen Stock Exchange, traded in foreign currencies and available for investment by domestic (Chinese) investors and foreign investors.

The Fund may also (or alternatively) invest in financial derivative instruments (FDIs) which relate to the Index or constituents of the Index. The FDIs which the Fund may use are futures, options (puts and calls), swaps (including equity swaps and swaps on the Index), currency forwards and non-deliverable forwards (a forward contract that does not require settlement on maturity) (NDFs). The Fund may also invest in ancillary liquid assets and money market instruments which may include bank deposits, depository receipts, certificates of deposit, fixed or floating rate instruments (treasury bills), commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix II of the Prospectus. Investment in ancillary liquid assets and money market instruments may be utilised in a variety of circumstances, including but not limited to, situations such as managing total exposure to cash and borrowing on a short term basis and in anticipation of participation in a rights offering.

Furthermore, the Fund may not invest less than 51% of its Net Asset Value in equity securities which constitute "equity participation" within the meaning of section 2, Article 8 of the German Investment Tax Act.

The Fund, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Investment Manager will regularly monitor the Fund's tracking accuracy.

Risk and Reward Profile

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 7 because funds of this type have experienced very high rises and falls in value in the past.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Liquidity Risks: Exists when a particular financial instrument is difficult to purchase or sell. If the relevant market is illiquid, it may not be possible to

initiate a transaction or liquidate a position at an advantageous or reasonable price, or at all.

- Limited Diversification Risk: The Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's Net Asset Value and may make the Fund more volatile than more diversified funds.
- Risk of investing in smaller companies: The securities of smaller companies may be more volatile and less liquid than the securities of large companies. Smaller companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities.
