Performance data for Irish domiciled ETFs is displayed on a Net Asset Value basis, in Base Currency terms, with net income reinvested, net of fees. Brokerage or transaction fees will apply.

The Dutch domiciled ETFs use a gross reinvestment index as opposed to many other ETFs and investment funds that use a net reinvestment index. Comparing with a gross reinvestment index is the purest form since it considers that Dutch investors can deduct or reclaim the dividend tax levied. Please note that the performance includes income distributions gross of Dutch withholding tax because Dutch investors can deduct or reclaim the 15% Dutch withholding tax levied. Different investor types and investors from other jurisdictions may not be able to achieve the same level of performance due to their tax status and local tax rules.

## Yields

12-Month Yield <sup>1</sup>	1.08%
-----------------------------	-------

<sup>1</sup>The 12-Month Yield is the yield an investor would have received if they had held the fund over the last 12 months assuming the most recent NAV. The 12-month yield is calculated by summing any income distributions over the past 12 months and dividing by the sum of the most recent NAV and any capital gain distributions made over the past 12 months. The dividend paid may differ from the dividend yield of the index by increasing or decreasing the fund. A part of the dividend can be reinvested whereby this is processed in the price and not paid out.

Yield to Maturity	2.82%
Effective Duration (yrs)	6.97
