Fund Description

The VanEck Global Hard Assets Fund (the "Fund") offers exposure to energy, precious metals, base metals, alternative energy and other commodities by investing in companies involved in the exploration, production and distribution of hard assets. The Fund provides potential diversification benefits through its low correlation to traditional asset classes. It is expertly managed by a thirteen-person team of investment professionals which is among the industry's largest and includes trained geologists, engineers, and senior analysts with deep sector experience.

The performance data quoted represents past performance which is no guarantee of future results and which may be lower or higher than current performance. Returns reflect temporary contractual fee waivers and/or expense reimbursements. Had the Fund incurred all expenses and fees, investment returns would have been reduced. Investment returns and Fund share values will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. Fund returns assume that dividends and capital gains distributions have been reinvested in the Fund at net asset value (NAV). Certain indices may take into account withholding taxes. An Index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made. Index returns assume that dividends of the Index constituents in the Index have been reinvested. Please call 800.826.2333 or visit vaneck.com for performance information current to the most recent month end.

Three-Year Risk Measures and Statistics

Volatility (Standard Deviation)	20.55
Sharpe Ratio	-0.38
Alpha vs. SPGINRTR Index	-5.79
Beta vs. SPGINRTR Index	1.00
R-squared vs. SPGINRTR Index	85.49

Five-Year Risk Measures and Statistics

Volatility (Standard Deviation)	23.44
Sharpe Ratio	-0.52
Alpha vs SPGINRTR Index	-5.07
Beta vs. SPGINRTR Index	1.08
R-squared vs. SPGINRTR Index	90.20

Source: VanEck and FactSet.

Volatility is the annualized standard deviation of monthly returns. Sharpe ratio is the return less the risk-free rate divided by the standard deviation and measures risk-adjusted return. Alpha is a measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. Beta is a measure of sensitivity to market movements. R-squared reflects the percentage of a fund's movements that can be explained by movements in its benchmark index.

Market Capitalization Breakdown

Market Capitalization	% of Net Assets
Large (>= \$10 billion)	59.7
Mid (< \$10 billion >= \$2 billion)	31.9
Small (< \$2 billion)	8.4
Average Weighted Market Cap	\$12.5B

Market capitalization (cap) is the value of a corporation as determined by the market price of its issued and outstanding common stock.

Portfolio facts and statistics are shown for Class A shares only unless otherwise noted; other classes may have different characteristics.

The S&P North American Natural Resources Sector (SPGINRTR) Index (the "Index") provides investors with a benchmark that represents U.S. traded securities that are classified under the GICS[®] energy and materials sector excluding the chemicals industry; and steel sub-industry. The MSCI ACWI Commodity Producers Index captures the global opportunity set of commodity producers in the energy, metal and agricultural sectors. The MSCI benchmark is a Gross Return index which reinvests as much as possible of a company's gross dividend distributions.

You can lose money by investing in the Fund. Any investment in the Fund should be part of an overall investment program, not a complete program. The Fund is subject to risks associated with concentrating its investments in Canadian issuers, commodities and commodity-linked derivatives, commodities and commodity-linked derivatives tax, derivatives, direct investments, emerging market securities, foreign currency transactions, foreign securities, other investment companies, management, market, operational, small- and medium-capitalization companies and hard assets sectors risks, including, precious metals and natural resources, that can be significantly affected by events relating to these industries, including international political and economic developments, inflation, and other factors. The Fund's portfolio securities may experience substantial price fluctuations as a result of these factors, and may move independently of the trends of industrialized companies. The Fund's investments in foreign securities involve risks related to adverse political and economic developments unique to a country or a region, currency fluctuations or controls, and the possibility of arbitrary action by foreign governments, including the takeover of property without adequate compensation or imposition of prohibitive taxation.

Investing involves risk, including possible loss of principal. Please call 800.826.2333 or visit vaneck.com for a free prospectus and summary prospectus. An investor should consider the investment objective, risks, and charges and expenses of the investment company carefully before investing. The prospectus and summary prospectus contain this and other information about the investment company. Please read the prospectus and summary prospectus carefully before investing.
