The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The "Net Asset Value" (NAV) of a Fund is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Investors should not expect to buy or sell shares at NAV.

Prior to September 1, 2020, the fund was known as the VanEck AMT-Free Intermediate Municipal Index ETF.

Index returns are not Fund returns and do not reflect any management fees or brokerage expenses. Certain indices may take into account withholding taxes. Investors can not invest directly in the Index. Index returns assume that dividends have been reinvested.

†Credit quality ratings are measured on a scale that ranges from AAA (highest) to D (lowest), and are based on credit ratings from S&P and Moody's. If more than one rating is available for an underlying security, the lower of the two ratings is used. If a bond issued by a national government, national government agency or supranational issuer is not rated, the issuer's credit rating will be used. If two issuer ratings are available, the lower of the two is used. If only one rating is available in all scenarios, we will use the rating provided. If no rating is available, the security will be not rated. Not rated securities do not necessarily indicate lower credit quality. Below investment-grade is represented by a rating of BB and below. Ratings and portfolio credit quality may change over time.

An investment in the Fund may be subject to risks which include, among others, municipal securities, credit, interest rate, call, California, New York, special tax bond, market, operational, sampling, index tracking, tax, authorized participant concentration, no guarantee of active trading, trading issues, passive management, fund shares trading, premium/discount and liquidity of fund shares, and concentration risks, all of which may adversely affect the Fund. Municipal bonds may be less liquid than taxable bonds. There is no guarantee that the Fund's income will be exempt from federal, state or local income taxes, and changes in those tax rates or in alternative minimum tax rates or in the tax treatment of municipal bonds may make them less attractive as investments and cause them to lose value. Capital gains, if any, are subject to capital gains tax. The Fund's assets may be concentrated in a particular sector and may be subject to more risk than investments in a diverse group of sectors.

**Investing involves substantial risk and high volatility, including possible loss of principal. Bonds and bond funds will decrease in value as interest rates rise.
