| IBXS15T (Index) | 0.55 | -0.75 | -0.75 | 2.38 | -2.47 | -1.62 | -0.47 | -0.31 | |

Past performance does not predict future returns.

Performance quoted represents past performance. Current performance may be lower or higher than average annual returns shown. Discrete performance shows 12 month performance to the most recent Quarter end for each of the last 5yrs where available. E.g. '1st year' shows the most recent of these 12-month periods and '2nd year' shows the previous 12 month period and so on.

Performance data for Irish domiciled ETFs is displayed on a Net Asset Value basis, in Base Currency terms, with net income reinvested, net of fees. Brokerage or transaction fees will apply.

The Dutch domiciled ETFs use a gross reinvestment index as opposed to many other ETFs and investment funds that use a net reinvestment index. Comparing with a gross reinvestment index is the purest form since it considers that Dutch investors can deduct or reclaim the dividend tax levied. Please note that the performance includes income distributions gross of Dutch withholding tax because Dutch investors can deduct or reclaim the 15% Dutch withholding tax levied. Different investor types and investors from other jurisdictions may not be able to achieve the same level of performance due to their tax status and local tax rules.

Yields

| | |
|-----------------------------|-------|
| 12-Month Yield ¹ | 0.96% |
|-----------------------------|-------|

¹The 12-Month Yield is the yield an investor would have received if they had held the fund over the last 12 months assuming the most recent NAV. The 12-month yield is calculated by summing any income distributions over the past 12 months and dividing by the sum of the most recent NAV and any capital gain distributions made over the past 12 months. The dividend paid may differ from the dividend yield of the index by increasing or decreasing the fund. A part of the dividend can be reinvested whereby this is processed in the price and not paid out.

Fundamentals*

31 March 2024

| | |
|--------------------------|-------|
| Yield to Worst | 2.65% |
| Yield to Maturity | 2.65% |
| Effective Duration (yrs) | 3.58 |
| Years to Maturity | 3.70 |
| Modified Duration (yrs) | 3.58 |
| Coupon | 0.90% |

* These figures represent averages. **Yield to Worst** measures the lowest of either Yield to Maturity or Yield to Call date on every possible call date. **Yield to Maturity** is the annualized return on a bond held to maturity. **Effective Duration** measures a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. This duration measure is appropriate for bonds with embedded options. **Modified Duration** measures a bond's sensitivity to interest rate changes that reflects the change in a bond's price given a change in yield. **Years to Maturity** is the period of time for which a financial instrument remains outstanding. Maturity refers to a finite time period at the end of which the financial instrument will cease to exist and the principal is repaid. **Coupon** is measured by weighting the coupon of each bond by its relative size in the portfolio. Coupons are fixed percentages paid on a fixed-income security on an annual basis. Averages are market weighted. The Coupon and Yield to Worst do not represent the performance of the Fund. These statistics do not take into account fees and expenses associated with investments of the Fund.

Key Risks

Changes in Interest Rates: hanges in interest rates have a significant influence on the results of fixed-income securities issued by governments. Potential or actual downgrades in the credit rating can increase the assumed risk level.

Credit Risk: The issuer of the security held by the Fund may be unable to pay interest that has fallen due or repay capital.

Liquidity Risk: Lower liquidity means there might not be enough buyers or sellers to allow the Fund to easily trade the investments. This is an additional factor to take into consideration before investing in a Government Bonds ETF.

For more information on risks, please see the "Risk Factors" section of the relevant Fund's prospectus, available on www.vaneck.com.

IMPORTANT INFORMATION

This is a marketing communication. Please refer to the prospectus of the UCITS and to the KID before making any final investment decisions.

This information originates from VanEck (Europe) GmbH, which has been appointed as distributor of VanEck products in Europe by the Management Company VanEck Asset Management B.V., a UCITS Management Company incorporated under Dutch law and registered with the Dutch Authority for the Financial Markets (AFM). VanEck (Europe) GmbH, with registered address at Kreuznacher Str. 30, 60486 Frankfurt, Germany, is a financial services provider regulated by the Federal Financial Supervisory Authority in Germany (BaFin). The information is intended only to provide general and preliminary information to investors and shall not be construed as investment, legal or tax advice.
