Past performance does not predict future returns.

Performance quoted represents past performance. Current performance may be lower or higher than average annual returns shown. Discrete performance shows 12 month performance to the most recent Quarter end for each of the last 5yrs where available. E.g. '1st year' shows the most recent of these 12-month periods and '2nd year' shows the previous 12 month period and so on.

Performance data for VanEck ETFs is displayed on a Net Asset Value basis, in Base Currency terms, with net income reinvested, net of fees. Brokerage or transaction fees will apply.

Key Risks

Equity Market Risk: The prices of the securities in the ETF are subject to the risks associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. Thus, an investment in the Fund may lose money.

Industry or Sector Concentration Risk: The Fund's assets may be concentrated in one or more particular sectors or industries. An eSports ETF may be subject to the risk that economic, political or other conditions that have a negative effect on the relevant sectors or industries will negatively impact the Fund's performance to a greater extent than if its assets were invested in a wider variety of sectors or industries.

Risk of Investing in Smaller Companies: The securities of smaller companies may be more volatile and less liquid than the securities of large companies. Smaller companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities. This is a risk factor of an eSports ETF.

For more information on risks, please see the "Risk Factors" section of the relevant Fund's prospectus, available on www.vaneck.com.
