Why CLOI?

- Portfolio of investment grade floating rate CLOs with limited exposure to rising rates
- Yield pickup versus similarly rated corporate bonds and loans with built-in protection against credit loss
- Actively managed by PineBridge, drawing on decades of CLO experience

What is a CLO?

- Securitized pool of senior secured loans
- Multiple tranches of debt with different ratings and varying levels of subordination
- Cashflows paid sequentially starting with senior most tranches, while losses absorbed by junior most tranches first

The "Net Asset Value" (NAV) of a VanEck Exchange Traded Fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck ETF investors should not expect to buy or sell shares at NAV.
