Forward Looking Approach to Credit Investing

VanEck Moody's Analytics IG Corporate Bond ETF and VanEck Moody's Analytics BBB Corporate Bond ETF provide exposure to investment grade bonds that are priced attractively given their embedded credit risk.

- Selects bonds with attractive risk-adjusted valuations, providing outperformance potential versus the broader market
- Quantitative approach uses market-based information, including the issuer's stock price, to develop a forward-looking assessment of credit risk
- Powered by Moody's Analytics credit risk platform, which is relied upon by over 650 of the world's largest institutional investors.

Moody's Analytics by the Numbers

A powerful approach to measuring credit risk:

- 45+ Years of default data
- 1989 Year data was first calculated
- 65,430 Publicly traded firms covered
- 250 Data points per issuer
- 10,500+ Defaults in database
- 80,960+ Active CUSIPS in database

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Please call 800.826.2333 or visit vaneck.com for performance current to the most recent month ended.

The "Net Asset Value" (NAV) of a VanEck Exchange Traded Fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. VanEck ETF investors should not expect to buy or sell shares at NAV.

Index returns are not Fund returns and do not reflect any management fees or brokerage expenses. Certain indices may take into account withholding taxes. Investors can not invest directly in the Index. Index returns assume that dividends have been reinvested.

This is not an offer to buy or sell, or a recommendation of any offer to buy or sell any of the securities mentioned herein. Fund holdings will vary. For a complete list of holdings in the ETFs, please visit vaneck.com.

An investment in the VanEck Moody's Analytics IG Corporate Bond ETF (MIG) and VanEck Moody's Analytics BBB Corporate Bond ETF (M BBB) may be subject to risks which include, among others, investing in European issuers, foreign securities, BBB-rated bond, credit, interest rate, liquidity risk related to bonds, restricted securities, financials sector, information technology sector, consumer discretionary sector, consumer staples sector, utilities sector, market, operational, call, sampling, index tracking, authorized participant concentration, no guarantee of active trading market, trading issues, high portfolio turnover, passive management, data, fund shares trading, premium/discount and liquidity of fund shares risks and non-diversified, index-related concentration risks, all of which may adversely affect the fund. The Fund's assets may be concentrated in a particular sector and may be subject to more risk than investments in a diverse group of sectors.
