March 2024

Technological Building Blocks of Tomorrow

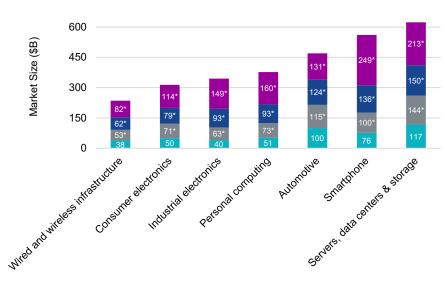

SMH VanEck Semiconductor ETF

Investing In The Semiconductor Industry

Semiconductors can be defined in many ways. Most importantly, they are the building blocks that power modern technology. A wide variety of technologies such as EVs and autonomous vehicles, smartphones, and even defense systems rely on memory chips, microprocessors and other advanced chips that the semiconductor industry supplies. SMH targets the largest publicly traded companies that derive the majority of their revenue from these activities. Semiconductors include memory, microprocessors and standard chips, as well as "Systems on a Chip" (SOC's) that power EV and autonomous vehicles. SMH targets publicly traded companies that derive the majority of their revenue from these activities.

Strong Demand Growth For Semiconductors Across Applications

■2020 ■2022 ■2025* ■2030*

Why SMH?

Semiconductors are vital to technology

Market size is projected to grow exponentially across multiple applications over the next decade

Strong industry revenue growth

Annual revenue growth across the industry has grown 7.7%* over the last decade

Pure-play access to industry leaders

The ETF's index methodology allocates to the largest, most liquid companies in the industry that derive 50% or more of their revenues from semiconductors or semiconductor equipment

VanEck Semiconductor ETF (SMH^{*}) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the MVIS^{*} US Listed Semiconductor 25 Index (MVSMHTR), which is intended to track the overall performance of companies involved in semiconductor production and equipment. Such companies may include medium-capitalization companies and foreign companies that are listed on a U.S. exchange. To be initially eligible for the Index, companies must generate at least 50% of their revenues from semiconductors. Semiconductors include companies engaged primarily in the production of semiconductors and semiconductor equipment.

The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Please call 800.826.2333 or visit vaneck.com for performance current to the most recent month ended.

The "Net Asset Value" (NAV) of a Fund is determined at the close of each business day, and represents the dollar value of one share of the fund it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF 's intraday trading value. Investors should not expect to buy or sell shares at NAV. Index returns assume reinvestment of all income and do not reflect any management fees or brokerage expenses associated with fund returns. Returns for actual fund investors may differ from what is shown because of differences in timing, the amount invested and fees and expenses. You cannot invest directly in an index.

MVIS® US Listed Semiconductor 25 Index (MVSMHTR): seeks to track the overall performance of companies involved in semiconductor production and equipment.

MarketVector Indexes GmbH (MVIS) develops, monitors and markets the MVIS Indices, a focused selection pf pure-play and investable indices designed to underlie financial products. They cover several asset classes including hard assets and the internal equity markets as well as fixed income markets. MVIS is the index business of VanEck, a U.S. based investment management firm and provider of VanEck ETFs.
