VanEck Vectors[®] Fallen Angel High Yield Bond ETF (ANGL[®])

ETF disclosure

This material does not constitute an offer to sell or solicitation to buy any security, including shares of any fund. An offer or solicitation will be made only through a fund's prospectus or summary prospectus and will be subject to the terms and conditions contained herein. This material and the information provided herein are not directed at or intended for distribution to any person (or entity) who is a citizen or resident of (or located or established in) any jurisdiction where the distribution of these materials and/or the purchase or sale of interests of a fund would be contrary to applicable law or regulation or would subject a Fund to any registration or licensing requirement in such jurisdiction. Persons who wish to review this material are required to inform themselves about and to observe any legal or regulatory restrictions which may affect their eligibility to make an investment in a fund. Professional advice should be sought in cases of doubt.

Any projections, market outlooks or estimates in this material are forward-looking statements and are based upon certain assumptions that are solely the opinion of VanEck. Any projections, outlooks or assumptions should not be construed to be indicative of the actual events which will occur. Further, any information regarding portfolio composition, portfolio composition methodology, investment process or limits, or valuation methods of evaluating companies and markets are intended as guidelines which may be modified or changed by VanEck at any time in its sole discretion without notice.

Index and fund performance data quoted represent past performance and are for illustration purposes only. Past performance is not a guarantee of future results. Performance information for the VanEck Vectors Fallen Angel High Yield Bond ETF (commenced 4/10/2012) reflects temporary waivers of expenses and/or fees. Had the Fund incurred all expenses, investment returns would have been reduced. Investment return and value of the shares of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Fund returns reflect dividends and capital gains distributions.

Forecasts, estimates, and certain information contained herein are based upon proprietary research and the information contained in this material is not intended to be, nor should it be construed or used as investment, tax or legal advice, any recommendation, or an offer to sell, or a solicitation of any offer to buy, an interest in any security. References to specific securities and their issuers or sectors are for illustrative purposes only and are not intended and should not be interpreted as recommendations to purchase or sell such securities or gain exposure to such sectors. The Fund(s) may or may not own the securities or be exposed to the sectors referenced and, if such securities are owned or exposure maintained, no representation is being made that such securities will continue to be held or exposure maintained.

Van Eck Securities Corporation, Distributor, 666 Third Avenue, New York, NY 10017

ETF disclosure

Performance and characteristics of the BofA Merrill Lynch US Fallen Angel High Yield Index (H0FA) are quoted throughout this material. H0FA is representative of the entire fallen angels high yield corporate bond market. H0FA does not represent the performance or yield of the Fund.

ETF Net Asset Values (NAVs) are determined at the close of each business day, and represent the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. ETF investors should not expect to buy or sell shares at NAV. Performance current to the most recent month end available by calling 800.826.2333 or by visiting vaneck.com.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units" and otherwise can be bought and sold only through exchange trading. Shares may trade at a premium or discount to their NAV in the secondary market. You will incur brokerage expenses when trading Fund shares in the secondary market. Past performance is no guarantee of future results. Returns for actual Fund investments may differ from what is shown because of differences in timing, the amount invested and fees and expenses.

Investing involves substantial risk and high volatility, including possible loss of principal. Bonds and bond funds will decrease in value as interest rates rise. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contain this and other information, call 888.286.2333 or visit vaneck.com. Please read the prospectus and summary prospectus carefully before investing.

An investment in the Fund may be subject to risk which includes, among others, credit risk, call risk, and interest rate risk, all of which may adversely affect the Fund. High yield bonds may be subject to greater risk of loss of income and principal and are likely to be more sensitive to adverse economic changes than higher rated securities. International investing involves additional risks which include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. The Fund's assets may be concentrated in a particular sector and may be subject to more risk than investments in a diverse group of sectors.

See index description at the end of this presentation.

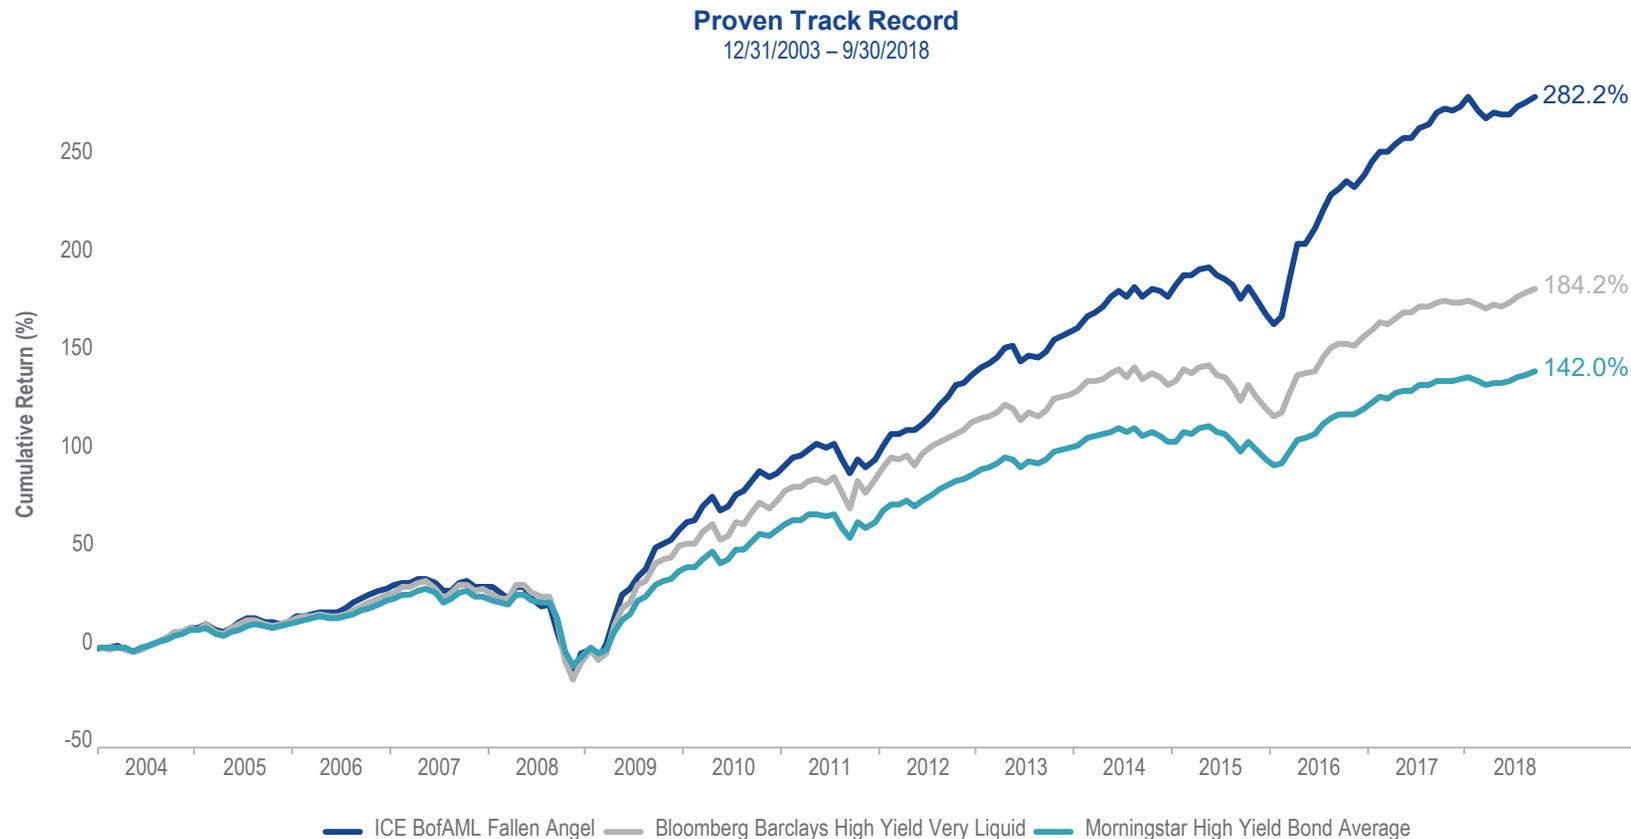

Van Eck methodology for the fallen angel bond sample set began with the H0FA index bond constituents that had more than six months performance and entered the index in 2004 or later. Fallen angel bond price levels were captured and cumulative returns were calculated, isolating 12 months of performance beginning six months prior to index entry through six months after entry. (Page 10)

Investing involves substantial risk and high volatility, including possible loss of principal. Bonds and bond funds will decrease in value as interest rates rise. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing. To obtain a prospectus and summary prospectus, which contains this and other information, call 800.826.2333 or visit vaneck.com. Please read the prospectus and summary prospectus carefully before investing.

Downgraded. Overlooked. Potentially undervalued.

Fallen angels, on average, have historically outperformed

- broad market high yield corporate bonds
- active high yield bond fund managers

Source: FactSet. Data as of 9/30/2018. This chart is for illustrative purposes only. Index performance is not illustrative of fund performance. Fund performance current to the most recent month end is available by visiting vaneck.com. Historical information is not indicative of future results; current data may differ from data quoted. Indexes are unmanaged and are not securities in which an investment can be made. Current data may differ from data quoted. Past performance is no guarantee of future results; VanEck Vectors Fallen Angel High Yield Bond ETF commenced on 4/10/2012. An investor cannot invest directly in an index. The results assume that no cash was added to or assets withdrawn from the Index. Index returns do not represent Fund returns. The Index does not charge management fees or brokerage expenses, nor does the Index lend securities, and no revenues from securities lending were added to the performance shown. Broad high yield bond market and active managers are represented by Bloomberg Barclays High Yield Very Liquid Index and Morningstar High-Yield Bond category average, respectively. See disclaimers on pages 2 through 3. See index descriptions at the end of this presentation.

What are fallen angels?

- Originally issued as investment grade corporate bonds, but have since been downgraded to non-investment grade (high yield) bond status
- Fallen angel issuers tend to be larger and more well-established companies. Some well-known fallen angels are ArcelorMittal, JC Penney, Dell, Sprint, Nokia
- Relative to the broad high yield bond market, fallen angels have historically averaged
 - Higher credit quality¹
 - Higher absolute returns²
 - Higher risk-adjusted returns³

Source: FactSet, ICE Data. Data as of 9/30/2018.

¹Fallen angels have had historically higher average credit quality than the broad high yield bond universe when comparing the ICE BofAML US Fallen Angel High Yield Index and ICE BofAML US High Yield Index. ICE Data composite ratings are simple averages of various rating agencies, and are not intended to be a credit opinion.

^{2,3}Represented by the ICE BofAML US Fallen Angel High Yield Index and the ICE BofAML US High Yield Index, respectively. Risk-adjusted returns are measured by Sharpe ratio, which is a statistical measure of the excess return of a portfolio over a risk-free rate of return (as found with a U.S. Treasury security) per unit of the portfolio's standard deviation of returns.

As of 9/30/2018, VanEck Vectors Fallen Angel High Yield Bond ETF net assets included 2.5% in ArcelorMittal, 0.4% in JC Penney, 2.2% in Dell, 3.5% in Sprint, and 0.4% in Nokia.

See disclaimers on pages 2 through 3. See index descriptions at the end of this presentation.

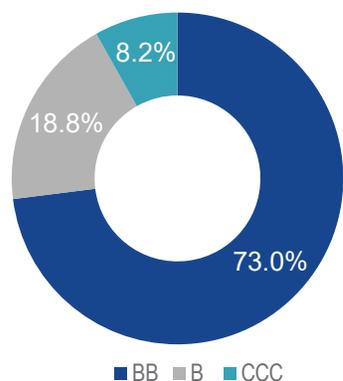

Higher quality high yield

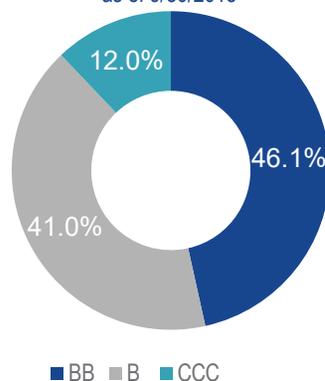

Relative to the broad high yield bond market, fallen angels have historically averaged

- Higher concentration of BB-rated bonds
- Lower yield and higher duration

ICE BofAML US Fallen Angel High Yield Index (H0FA)
as of 9/30/2018

ICE BofAML US High Yield Index (H0A0)
as of 9/30/2018

Data as of 9/30/2018	Current Yield to Worst (%)	Modified Duration	Market Value (\$Mil)	# of Bonds in Index	% of Fallen Angels
ICE BofAML US Fallen Angel	6.03	6.22	123,339	226	100%
ICE BofAML US High Yield	6.24	4.58	1,258,737	1,866	10%

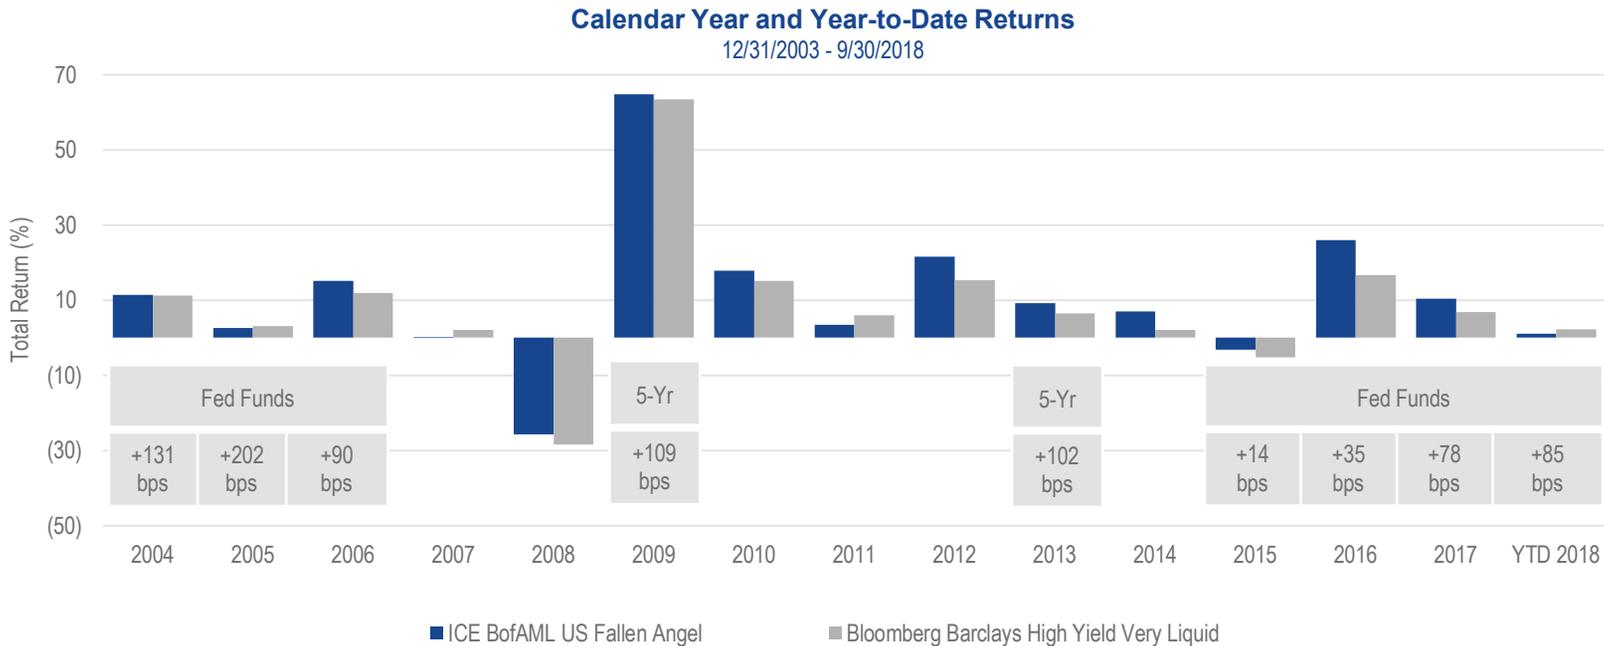

Source: FactSet. Index performance is not illustrative of fund performance. Fund performance current to the most recent month end is available by visiting vaneck.com. Historical performance is not indicative of future results; current data may differ from data quoted. Indexes are unmanaged and are not securities in which an investment can be made. Yield to Worst is generally defined as being the lowest yield that a buyer can expect to receive. Modified Duration measures the responsiveness of a bond's price to interest rate changes. It is defined as the percentage change in price for a 100 basis point change in interest rates. Broad high yield bond market is represented by the ICE BofAML US High Yield Index. See disclaimers on pages 2 through 3. See index descriptions at the end of this presentation.

Outperformed broad high yield bond market

Fallen angels outperformed the broad high yield bond market 11 of the last 14 calendar years and 4 of 5 calendar years when rates rose significantly

- Federal funds interest rates last rose 2004-2006, 2015-2018
- 5-Year U.S. Treasury rates last rose by more than 1% in 2009 and 2013

Source: FactSet. Data as of 9/30/2018. This chart is for illustrative purposes only. Index performance is not illustrative of fund performance. Fund performance current to the most recent month end is available by visiting vaneck.com. Historical information is not indicative of future results. Current data may differ from data quoted. Past performance is no guarantee of future results; VanEck Vectors Fallen Angel High Yield Bond ETF commenced on 4/10/2012. An investor cannot invest directly in an index. The results assume that no cash was added to or assets withdrawn from the Index. Index returns do not represent Fund returns. Broad high yield bond market is represented by the Bloomberg Barclays High Yield Very Liquid Index. See index descriptions and important disclosures at the end of the presentation. Bps is short for basis points.

Higher risk-adjusted returns

Fallen angels have historically offered a more attractive risk/reward tradeoff than the broad high yield bond market

5-Year Historical Annualized Returns and Standard Deviation (%)

Data as of 9/30/2018

	YTD	1 YR	3 YR	5 YR	Entire Period		
					Annualized Return	Annualized StdDev	Sharpe Ratio
ICE BofAML US Fallen Angel	1.12	2.03	10.95	8.64	8.64	5.95	1.37
ICE BofAML Original Issue High Yield	2.68	3.03	7.75	5.08	5.08	4.83	0.95
Bloomberg Barclays High Yield Very Liquid	2.26	2.45	7.65	5.03	5.03	5.29	0.86

Source: FactSet. Index performance is not illustrative of fund performance. Fund performance current to the most recent month end is available by visiting vaneck.com. Historical performance is not indicative of future results; current data may differ from data quoted. Indexes are unmanaged and are not securities in which an investment can be made. **Standard deviation** is the statistical measure of the historical return volatility of a portfolio. **Sharpe ratio** is a statistical measure of the excess return of a portfolio over a risk-free rate of return (as found with a U.S. Treasury security) per unit of the portfolio's standard deviation of returns. Broad high-yield bond market is represented by Bloomberg Barclays High Yield Very Liquid Index. See disclaimers on pages 2 through 3. See index descriptions at the end of this presentation.

Higher average price appreciation

- Fallen angels have averaged higher price appreciation than original-issue high yield bonds
- Price appreciation may be attributed to bonds being oversold before their actual downgrade to high yield and inclusion in the index

Calendar Year and Year-to-Date Price Returns and Yield (%)
12/31/2003 - 9/30/2018

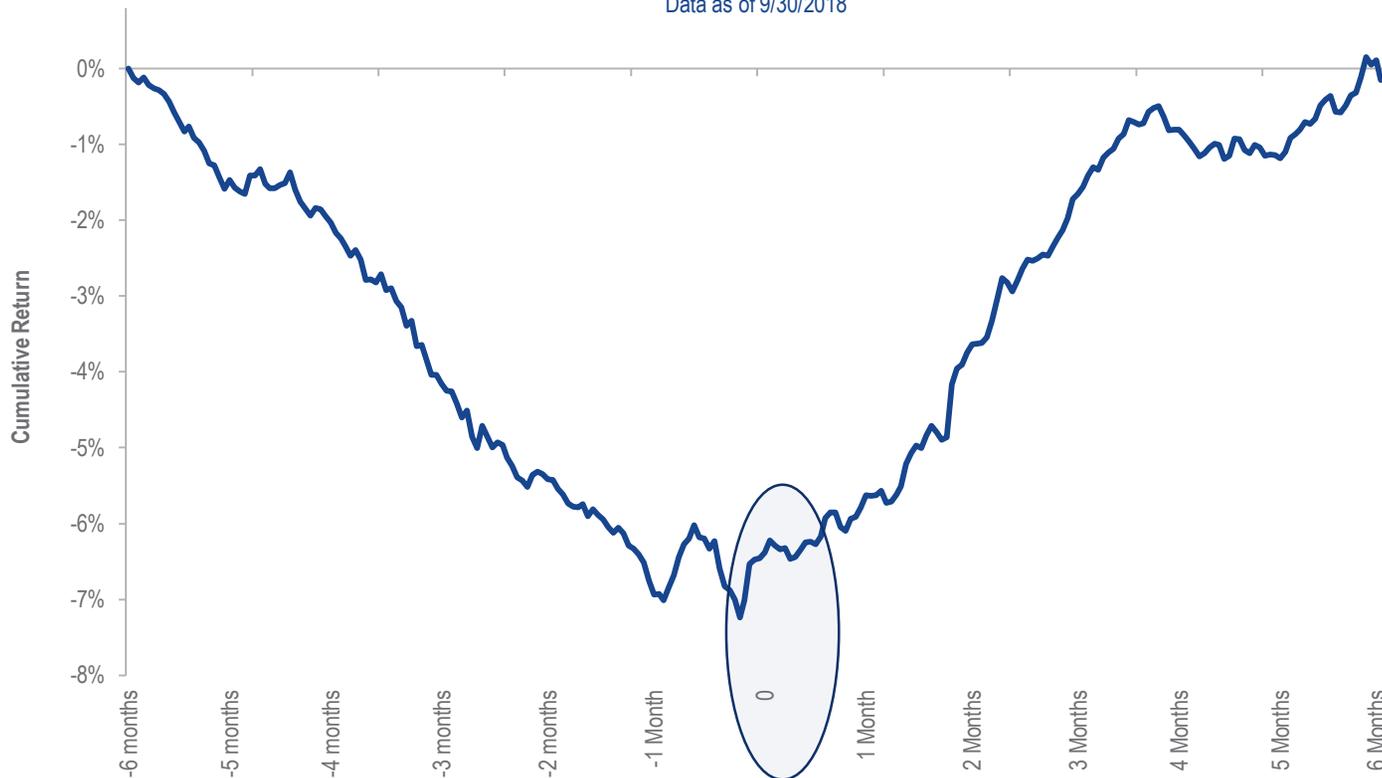

Source: FactSet. Data as of 9/30/2018. This chart is for illustrative purposes only. Index performance is not illustrative of fund performance. Fund performance current to the most recent month end is available by visiting vaneck.com. Historical information is not indicative of future results. Current data may differ from data quoted. Past performance is no guarantee of future results; VanEck Vectors Fallen Angel High Yield Bond ETF commenced on 4/10/2012. An investor cannot invest directly in an index. The results assume that no cash was added to or assets withdrawn from the Index. Index returns do not represent Fund returns. The Index does not charge management fees or brokerage expenses, nor does the Index lend securities, and no revenues from securities lending were added to the performance shown. Original-issue high yield bond market is represented by ICE BofAML US Original Issue High Yield Index. See disclaimers on pages 2 through 3. See index descriptions at the end of this presentation.

Forced selling prior to downgrade

- Rating actions tend to be anticipated by the market, and significant price deterioration often has occurred prior to bonds entering the ICE BofAML US Fallen Angel Index
- Increasing exposure to falling angels, as they enter the ICE BofAML US Fallen Angel Index, with monthly rebalances, often represents a contrarian approach

Average fallen angel bond cumulative return from 6 months before to 6 months after entering the ICE BofAML US Fallen Angel Index

Data as of 9/30/2018

This chart is for illustrative purposes only. Index performance is not illustrative of fund performance. Fund performance current to the most recent month end is available by visiting vaneck.com. Historical information is not indicative of future results. Current data may differ from data quoted. Past performance is no guarantee of future results; VanEck Vectors Fallen Angel High Yield Bond ETF commenced on 4/10/2012. An investor cannot invest directly in an index. The results assume that no cash was added to or assets withdrawn from the Index. Index returns do not represent Fund returns. The Index does not charge management fees or brokerage expenses, nor does the Index lend securities, and no revenues from securities lending were added to the performance shown.

Source: FactSet. Data is based on bond constituents of the ICE BofAML US Fallen Angel Index that were downgraded to high yield and entered the index in 2004 or later. See further details on methodology along with disclaimers on pages 2 through 3. See index description at the end of this presentation.

A tale of two angels

By the time of the downgrade, the creditworthiness of fallen angel companies have become impaired and their debt obligations may carry greater risk of credit losses

Case Study #1: Lehman Brothers

Date	Rating Change		Ratings Outlook	Rationale
	From	To		
9/15/2008	A2	B3	Negative	Unable to refinance debt due to severe credit deterioration; bankruptcy impending
12/8/2008	B3	C	Rating to be withdrawn	Company went bankrupt and defaulted on debt

However, if they survive, many of the fallen angels adjust their business models or enjoy strengths of a brand name company that can enable them to regain investment grade status

Case Study #2: Xerox

Date	Rating Change		Ratings Outlook	Rationale
	From	To		
12/1/2000	Baa2	Ba1	Negative	Declining business environment, management and operations problems, liquidity strain
5/1/2002	Ba1	B1	Negative	Continued concern regarding free cash flow
8/10/2004	B1	Ba2	Stable	Good operational execution and improving profits and free cash flow; reduced leverage
9/5/2005	Ba2	Ba1	Positive	Continued improvement in business and balance sheet management
11/29/2006	Ba1	Baa3	Positive	Solid business execution, stable profitability, solid free cash flow generation

Source: www.moodys.com. See disclaimers on pages 2 through 3.

High yield default rates

Fees and Expenses (%)*

Management Fee	0.40
Other Expenses	0.04
Gross Expense Ratio	0.44
Fee Waivers and Expense Reimbursement	-0.09
Net Expense Ratio	0.35

Source: VanEck.

*Expenses for ANGL are capped contractually at 0.35% until at least 9/1/2019. Cap excludes acquired fund fees and expenses, interest expense, trading expenses, taxes and extraordinary expenses. 30-Day SEC Yield reflects the investment income earned after deducting a fund's expenses for the period. This yield does not necessarily reflect the yield that an investor will receive. Distributions may vary from time to time. In the absence of temporary expense waivers or reimbursements, the 30-Day SEC Yield would have been 5.57% on 9/30/2018.

Returns greater than one year are annualized.

The table presents past performance which is no guarantee of future results and which may be lower or higher than current performance. Returns reflect temporary contractual fee waivers and/or expense reimbursements. Had the ETF incurred all expenses and fees, investment returns would have been reduced. Investment returns and ETF share values will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. Performance current to the most recent month end is available by calling [800.826.2333](tel:800.826.2333) or on vaneck.com. ETF returns assume that dividends and capital gains distributions have been reinvested in the Fund at NAV. The "Net Asset Value" (NAV) of a VanEck Vectors Exchange Traded Fund (ETF) is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF 's intraday trading value. VanEck Vectors ETF investors should not expect to buy or sell shares at NAV.

See disclaimers on pages 2 and 3

Index descriptions

The indices listed are unmanaged indices and do not reflect the payment of transaction costs, advisory fees or expenses that are associated with an investment in the Fund. An index's performance is not illustrative of the Fund's performance. Indices are not securities in which investments can be made.

ICE BofAML US Fallen Angel: ICE BofAMLUS Fallen Angel High Yield Index (H0FA) is a subset of the ICE BofAML US High Yield Index including securities that were rated investment grade at point of issuance.

ICE BofAML US High Yield: ICE BofAML US High Yield Index (H0A0) tracks the performance of U.S. dollar-denominated below investment grade corporate debt publically issued in the U.S. domestic market. Qualifying securities must have a below investment grade rating. Original issue zero coupon bonds, 144a securities, both with and without registration rights, and pay-in-kind securities, including toggle notes, qualify for inclusion. Eurodollar bonds, taxable and tax-exempt U.S. municipal, warrant-bearing, DRD-eligible and defaulted securities are excluded from the Index.

ICE BofAML US Original Issue High Yield: ICE BofAML US Original Issue High Yield Index (H0HY) is a subset of the ICE BofAML US High Yield Index including securities that were not rated investment grade at the point of issuance.

Bloomberg Barclays US Aggregate: Barclays US Aggregate Bond Index is a broad-based benchmark that measures the investment grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS, ABS, CMBS.

Bloomberg Barclays High Yield Very Liquid: Barclays US High Yield Very Liquid Index is a more liquid version of the Barclays Capital US Corporate High-Yield Index that measures the market of USD-denominated, non-investment grade, fixed-rate, taxable corporate bonds. Qualifying issues must have been issued within the past three years, have a USD 600 million minimum amount outstanding and include only the largest issue from each issuer.

Morningstar High-Yield Bond Peer Group is comprised of open-end mutual funds with an investment objective to seek returns via significant exposure to low quality bonds, those that are either unrated or rated by a major agency as BB or lower.

Morningstar U.S. Fund High Yield Bond category average is comprised of exchange-traded and open-end mutual funds with an investment objective to seek returns via significant exposure to low quality bonds, those that are either unrated or rated by a major agency as BB or lower.

US 10YR Treasury: ICE BofAML Current 10-Year US Treasury Index is a one-security index comprised of the most recently issued 10-year U.S. Treasury bond. To qualify for the inclusion, the 10-year bond must be auctioned on or before the third business day before the last business day of the month.

US 5YR Treasury/5-Year: ICE BofAML Current 5-Year US Treasury Index is a one-security index comprised of the most recently issued 5-year U.S. Treasury bond. To qualify for the inclusion, the 5-year bond must be auctioned on or before the third business day before the last business day of the month.

Fed Funds: Federal funds effective rate is the interest rate at which depository institutions actively trade balances (federal funds) held at the Federal Reserve with each other, usually overnight, on an uncollateralized basis.

S&P 500: Standard & Poor 500 Index, calculated with dividends reinvested, consists of 500 widely held common stocks covering the industrial, utility, financial and transportation sectors.
